L'inconscio tra desiderio e sinthomo To this day, no comprehensive academic study of the development of guidebooks to Rome over time has been performed. This book treats the history of guidebooks to Rome from the Middle Ages up to the early twentieth century. It is based on the results of the interdisciplinary research project Topos and Topography, led by Anna Blennow and Stefano Fogelberg Rota.	From the case studies performed within the project, it becomes evident that the guidebook as a phenomenon was formed in Rome during the later Middle Ages and early Renaissance. The elements and rhetorical strategies of guidebooks over time have shown to be surprisingly uniform, with three important points of development: a turn towards a more user- friendly structure from the seventeenth century and onward; the so-called	'Baedeker effect' in the mid-nineteenth century; and the introduction of a personalized guiding voice in the first half of the twentieth century. Thus, the 'guidebook tradition' is an unusually consistent literary oeuvre, which also forms a warranty for the authority of every new guidebook. In this respect, the guidebook tradition is intimately associated with the city of Rome, with which it shares a constantly renovating yet eternally fixed nature.

<u>Annual cumulation</u> University of Notre Dame Pess The present study addresses problems of an epistemological nature which hinge on the question of how to define Jewish thought. It will take its start in an ancient question, that of the relationship between Jewish culture, Greek philosophy, and	then Greco-Roman (and Christian) thought in connection with the query into the history and genealogy of wisdom and knowledge. Our journey into the history of the denomination 'Jewish philosophy' will include a leg that will lead us to certain declarations of political, moral, and scientific	principles, and then on to the birth of what is called philosophia perennis or, in Christian circles, prisca theologia. Our subject of inquiry will thus be the birth of the concept of Jewish philosophy, Jewish theology and Jewish philosophy of religion. A special emphasis will fall on the topic treated in the last

part of this study: Jewish scepticism, a theme that involves a philosophical attitude founded on dialectical "enquiry", as the etymology of the Greek word *skepsis* properly means. From the Middle Ages to the 20th Century Walter de Gruyter GmbH & Co KG This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a

resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials. Elements of Tragedy in Flavian Epic Springer Science & Business Media "From Darkness to Light explores from a variety of angles the subject of museum lighting in exhibition spaces in America, Japan, and Western Europe throughout the nineteenth and twentieth centuries. Written by

an array of international experts, these collected essays gather perspectives from a diverse range of cultural sensibilities. From sensitive discussions of Tintoretto's unique approach to the play of light and darkness as exhibited in the Scuola Grande di San Rocco in Venice, to the development of museum lighting as part of Japanese artistic self-fashioning, via the story of an epic American painting on tour, museum illumination in the work of Henry James, and lighting alterations at Chatsworth (to name only a few topics) this book is a treasure trove of illuminating contributions. The

collection is at once a refreshing insight for the enthusiastic museum-goer, who is brought to an awareness of the exhibit in its immediate environment, and a wide-ranging scholarly compendium for the professional who seeks to proceed in their academic or curatorial work with a more enlightened sense of the lighted space."--Publisher's website.

The Act of Living

This searing indictment, David Healy's most comprehensive and forceful argument against the pharmaceuticalization of medicine, tackles

problems in health care that are leading to a growing number of deaths and disabilities. Healy, who was the first to draw attention to the now well-publicized suicide-inducing side effects of many anti-depressants, attributes our current state of affairs to three key factors: product rather than process patents on drugs, the classification of certain drugs as prescription-only, and industry-

controlled drug trials. These developments have tied the survival of pharmaceutical companies to the development of blockbuster drugs, so that they must overhype benefits and deny real hazards. Healy further explains why these trends have basically ended the possibility of universal health care in the United States and elsewhere around the world. He concludes

with suggestions for reform of our currently corrupted evidence-based medical system. A Postcolonial Critique Prentice Hall Nuova edizione In questa edizione aggiornata del classico Errori da non ripetere, Daniel Siegel, psichiatra infantile di fama internazionale, e Mary Hartzell, educatrice e psicologa, evidenziano quanto le esperienze infantili influenzino il modo di essere genitori. Si tratta, per i genitori, di non ripetere modelli di

interazione inadeguati, non compatibili con le relazioni di cura e amore immaginate per i propri figli. Basandosi sugli studi più recenti nel campo della neurobiologia interpersonale, gli autori mostrano come le prime interazioni del bambino con le figure di riferimento abbiano un impatto diretto sulla struttura e sul funzionamento del cervello. Un attaccamento sicuro nei confronti di un adulto in grado di rispondere alle richieste

primarie del bambino è di fondamentale importanza per il suo sviluppo cognitivo ed emotivo. Unendo la competenza di Daniel Siegel come studioso della mente e l'esperienza di Mary Hartzell come educatrice, questo libro aiuta a costruire con i propri figli relazioni fondate su sicurezza e amore.

“ Perché abbiamo con i nostri figli gli stessi comportamenti che da bambini ci hanno fatto soffrire? ” “ Come liberarci dai vincoli del passato che

continuano a condizionarci nel presente? ”

Secondo un recente rapporto dell'Harvard School of Public Health e del World Economic Forum, i disturbi mentali, intesi sia come patologie psichiatriche che neurologiche, saranno nei Paesi ad alto reddito la causa principale di mortalità e disabilità. Anoressia e bulimia, disturbi bipolari, depressioni gravi, schizofrenie e altre patologie riducono e ostacolano sempre di più la

vita sociale e con essa i rapporti umani, comunicativi e lavorativi. Attraverso numerosi aggiornamenti e l'esposizione di alcuni casi clinici, in particolare quello di Adele, un esempio di bulimia-anoressia mentale, viene affrontato un tema molto importante: che aiuto può dare la psicoanalisi ad orientamento freudiano e lacaniano a questi problemi, considerati in molti casi dei nuovi sintomi della società contemporanea? E cosa può fare la differenza tra un approccio analitico e uno più consueto come quello psicoterapeutico o che contempla un trattamento

prettamente farmacologico e ospedaliero?

This book is the first dedicated volume of academic analysis on the monumental work of Elena Ferrante, Italy's most well-known contemporary writer. The Works of Elena Ferrante: Reconfiguring the Margins brings together the most exciting and innovative research on Ferrante's treatment of the intricacies of women's lives, relationships, struggles, and dilemmas to explore feminist theory in literature; questions of

gender in twentieth-century Italy; and the psychological and material elements of marriage, motherhood, and divorce. Including an interview from Ann Goldstein, this volume goes beyond "Ferrante fever" to reveal the complexity and richness of a remarkable oeuvre.

professional activity is still in its infancy, despite some highly promising publications in recent years. This special issue of *The Translator*, guest-edited by one of the leading scholars in translation studies, provides a forum for bringing together separate strands within this developing field and should create an impetus for further research. Viewing the interpreter as a gatekeeper, coordinator and negotiator of meanings

within a three-way interaction, the descriptive studies included in this volume focus on issues such as role-conflict, in-group loyalties, participation status, relevance and the negotiation of face, thus linking the observation of interpreting practice to pragmatic constraints such as power, distance and face-threat and to semiotic constraints such as genres and discourses as socio-textual practices of particular cultural communities.

The epics of the three Flavian poets--Silius Italicus, Statius, and Valerius Flaccus--have, in recent times, attracted the attention of scholars, who have re-evaluated the particular merits of Flavian poetry as far more than imitation of the traditional norms and patterns. Drawn from sixty years of scholarship, this edited collection is the first volume to collate the most influential modern

academic writings on Flavian epic poetry, revised and updated to provide both scholars and students alike with a broad yet comprehensive overview of the field. A wide range of topics receive coverage, and analysis and interpretation of individual poems are integrated throughout. The plurality of the critical voices included in the volume presents a much-needed variety of approaches, which are used to tackle questions

of intertextuality, gender, poetics, and the social and political context of the period. In doing so, the volume demonstrates that by engaging in a complex and challenging intertextual dialogue with their literary predecessors, the innovative epics of the Flavian poets respond to contemporary needs, expressing overt praise, or covert anxiety, towards imperial rule and the empire.
Routledge
A History of

Architectural Conservation expands knowledge about the conservation of ancient monuments, works of art and historic buildings. It includes the origins of the interest in conservation within the European context, and the development of the concepts from Antiquity and the Renaissance to the present day. Jokilehto illustrates how this development has influenced international collaboration in the

protection and conservation of cultural heritage, and how it has formed the principal concepts and approach to conservation and restoration in today's multi-cultural society. This book is based on archival research of original documents and the study of key restoration examples in countries that have influenced the international conservation movement. Accessible and of great

interest to students and the general public it includes conservation trends in Europe, the USA, India, Iran and Japan. Jesuits, Jews, and Holocaust Remembrance Routledge While much has been written about the Catholic Church and the Holocaust, little has been published about the hostile role of priests, in particular Jesuits, toward Jews and Judaism. Jesuit Kaddish is a long overdue study that examines

Jesuit hostility toward Judaism before the Shoah and the development of a new understanding of the Catholic Church ' s relation to Judaism that culminated with Vatican II ' s landmark decree Nostra aetate. James Bernauer undertakes a self-examination as a member of the Jesuit order and writes this story in the hopes that it will contribute to interreligious reconciliation. Jesuit Kaddish demonstrates the way Jesuit hostility

operated, examining Jesuitproposed statement of moral theology ' s dualisticrepentance from the approach to sexuality and, Jesuits and an appendix in the case of Nazi Germany, the articulation of an unholy alliance between a sexualizing and a Judaizing of German culture. Bernauer then identifies an influential group of Jesuits whose thought and action contributed to the developments in Catholic teaching about Judaism that eventually led to the watershed moment of Nostra aetate. This book concludes with a

presenting the fifteen Jesuits who have been honored as " Righteous Among the Nations " by Israel ' s Yad Vashem Holocaust Center. Jesuit Kaddish offers a crucial contribution to the fields of Catholicism and Nazism, Catholic-Jewish relations, Jesuit history, and the history of anti-Semitism in Europe. Esercizi filosofici Routledge In the light of recent

scholarly work on tragic patterns and allusions in Flavian epic, the publication of a volume exclusively dedicated to the relationship between Flavian epic and tragedy is timely. The volume, concentrating on the poetic works of Silius Italicus, Statius and Valerius Flaccus, consists of eight original contributions, two by the editors themselves and a further six by experts

on Flavian epic. The volume is preceded by an introduction by the editors and it concludes with an 'Afterword' by Carole E. Newlands. Among key themes analysed are narrative patterns, strategies or type-scenes that appear to derive from tragedy, the Aristotelian notions of hamartia and anagnorisis, human and divine causation, the 'transfer' of individual characters from tragedy to epic, as well as instances of tragic language and imagery. The volume at hand showcases an array of methodological approaches to the question of the presence of tragic elements in epic. Hence, it will be of interest to scholars and students in the area of Classics or Literary Studies focusing on such intergeneric and intertextual connections; it will be also of interest to

scholars working on Flavian epic or on the ancient reception of Greek and Roman tragedy.
