That's all it takes for the lives of two young people to be changed forever. Alex Chin has the world on a plate. A football hero and homecoming king with plenty of scholarship offers, his future looks bright. His tutor, Samantha Dixon, is preparing to graduate high school at the top of her class. Death seems to follow him wherever he goes, and now it's after him. Alex flees. He tells Samantha not to follow, but she became involved the moment she walked through his door and found Mr. and Mrs. Chin as they lay dying in their home. She cannot abandon the young man she loves. The two race desperately to stay ahead of Alex's attackers long enough to figure out why they are hunting him in the first place. The answer lies with a secret buried deep in his past, a secret his parents died to protect. Alex always knew he was adopted, but he never knew the real reason his birth parents abandoned him. Routledge Progress in mathematics frequently occurs first by studying particular examples and then by generalizing the patterns that have been observed into far-reaching theorems. Similarly, in teaching mathematics one often employs examples to motivate a general principle or to illustrate its use. This volume uses the same idea in the context of learning how to teach: By analyzing particular teaching situations, one can develop broadly applicable teaching skills useful for the professional mathematician. These teaching situations are the Case Studies of the title. Just as a good mathematician seeks both to understand the details of a particular problem and to put it in a broader context, the examples presented here are chosen to offer a serious set of detailed teaching issues and to afford analysis from a broad perspective. Each case raises a variety of pedagogical and communication issues that may be explored either individually or in a group facilitated by a faculty member. Teaching notes for such a facilitator are included for each Case in the Faculty Edition. The methodology of Case Studies is widely used in areas such as business and law. The consideration of the mathematics cases presented here will help readers to develop teaching skills for their own classrooms.

Some ten years from today, American schools have tried every possible education fad. Common national standards, year-round schools, takeover of school boards, and even the super-qualified teacher program have failed to improve low U.S. achievement on international assessments. That all changes when Grant and Jennifer Wilson, both Stanford Ph.D. graduates, create what

they believe are the perfect tests. The Venus Assessment System, the first national tests in U.S. history, flip American education on its ear, making U.S. students number one in the world in math and science. But then Jennifer Wilson discovers a secret list of names, students who are exceptions to the high-stakes consequences of the test. So secret that some people are willing to kill for it. With a tremendous blending of suspense tied to realistic future events, The Perfect Test will appeal to readers of all types, from educators and parents to simply anyone who loves a great, page-turner. As writer Paul Baker from the University of Wisconsin says, " Like The Name of the Rose and The Da Vinci Code, this story grabs the reader and won't let go. "

" At a moment of national testing madness, the [Perfect Test] story-line was both fun and gripping. And like all good mystery/science fiction, educational too. I won't give away the ending. " Deborah Meier, New York University: teacher, writer, and public activist. Author of In Schools We Trust and Many Children Left Behind " Ron Dietel's The Perfect Test reads like a Stephen King novel. A perfect blend of mystery, action and constant surprises, nicely intertwined in a future world of national high-stakes tests. You won't be able to stop reading it. " Jim Kohlmoos, President, Knowledge Alliance: Research to Action in Education " Ready for a break, for a romp? Pick up Ronald Dietel's biting spoof, The Perfect Test. It's a dystopian vision of a world gone crazy, a science fiction portrait of the future that often comes wickedly close to where we are now. John Merrow, President, Learning Matters
