Cast Iron Technology presents a critical review of the nature of cast irons. It discusses the types of cast iron and the general purpose of cast irons. It also presents the history of the iron founding industry. Some of the topics covered in the book are the description of liquid metal state; preparation of liquid metal; process of melting; description of cupola melting and electric melting methods; control of composition of liquid metal during preparation; description of primary cast iron solidification structures; and thermal analysis of metals to determine its quality. Solidification science and the fundamentals of heat treatment are also discussed. An in-depth analysis of the hot quenching techniques is provided. The graphitization potential of liquid iron is well presented. A chapter is devoted to microstructural features of cast iron. The book can provide useful information to iron smiths, welders, students, and researchers.

This compendium of US Army cooking manuals features recipes, camp cooking tips, and more from the Revolutionary War to WWI. This collection of excerpts from US Army cooking manuals illustrates how America fed its troops from the late eighteenth century to the early twentieth, offering a glimpse of what daily life was like for those preparing and consuming the rations. With an introduction explaining the historical background, this is a fascinating and fun exploration of American army cooking, with a dash of inspiration for feeding your own army! Beginning with a manual from 1775, you will learn how the Continental Congress kept its Patriot forces fed. A manual from 1896 prepares Army cooks for any eventuality—whether in the garrison, in the field, or on the march—with instructions on everything from butchery and preserving meat to organizing food service and cleaning utensils. Along with classic American fare such as chowder, hash, and pancakes, it also includes recipes for Crimean kebabs, Turkish pilau, and tamales. In contrast, a 1916 manual offers a detailed consideration of nutrition and what must be one of the first calorie counters. Instructions are given on how to assemble a field range in a trench or on a train. Among the more unusual recipes are head cheese—meat stew made from

scraps—and pickled pigsfeet. Later manuals produced during WWI include baking recipes for breads and cakes, as well as how to cook dehydrated products. "Culinary and military historians will equally find this a valuable resource." —Booklist

This autobiographical account of the career of Edwin Herbert Samuel, the second Viscount and son of the famous Liberal politician, is distinguished both for the historical importance and for the content and incisiveness of the writing. The book will prove fascinating to readers who enjoy good autobiography, especially those interested in following the saga of Palestine and Israel as told by one who has observed it closely for more than fifty years. The current volume presents material on Julius Simon's Zionist life and activity from the beginning of the century until the establishment of the state of Israel. Selected letters and documents, a chronological table, and an index are included.

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".
