More than most other books about the criminal law, this presentation focuses on "Learning Criminal Law as Advocacy Argument." In each criminal-law topic, it presents in building-block form the limited repertoire of core issues and related arguments so that you can concentrate on learning and practicing those that your professor has stressed in class, in her materials, and on her old exams. You can know the issues on the exam before you go into the exam room. In each criminal-law topic there is a limited repertoire of core issues that must be identified and then resolved with advocacy argument. This pattern of issues and arguments arises

from embedded and recurring factual patterns and the resulting criminal law performance of prosecutors, defense lawyers, and trial and appellate judges over decades and even centuries. Your professor presents only some of the core issues and related arguments from these repertoires in her course and on her criminal-law exam. Thus, you can systematically learn the set of core issues and arguments in each topic presented by your professor and know the issues before you go into the exam room. The exam then presents no surprises. What do you mean by resolving the core issues "with advocacy argument?" Identifying the core issues from your professor's course is the first critical task. The second critical task is resolving these issues with advocacy argument. Advocacy argument is the lawyer's single-minded marshalling of the relevant facts and doctrine that are necessary to resolve the identified issues in favor of either the prosecution or defense. This book helps you with both tasks: identifying the exam issues and resolving them.

This volume brings together a collection of essays, many of them scholarly classics, which form part of the debates on three questions central to criminal law theory. The first of these questions is: what conduct should be necessary for criminal liability, and what sufficient? The answer to this question has wider implications for the debate about morality enforcement given the concern that the "harm principle" may have collapsed under its own weight. Secondly, essays address the question of what culpability should be necessary for criminal liability, and what

sufficient? Here, the battles continue over whether the formulation of doctrines - such as the insanity defense, criminal negligence, strict liability, and others - should ignore or minimize the extent of an offender's blameworthiness in the name of effective crime-control. Or, are methods of accommodating the tension now in sight? Finally, essays consider the question of how criminal law rules should be best organized into a coherent and clarifying doctrinal structure. The structure grown by the common law process competes not only with that of modern comprehensive codifications, such as the America Law Institute's Model Penal Code, but also with alternative structures imagined but not yet tried.
