"An inspiring true story of a boy genius. "Plowing a potato field in 1920, a 14-year-old farm boy from Idaho saw in the parallel rows of overturned earth a way to make pictures fly through the air. This boy was not a magician; he was a scientific genius and just eight years later he made his brainstorm in the potato field a reality by transmitting the world's first television image. This fascinating picture-book biography of Philo Farnsworth covers his early interest in machines and electricity, leading up to how he put it all together in one of the greatest inventions of the 20th century. The author's afterword discusses the lawsuit Farnsworth waged and won against RCA when his high school science teacher testified that Philo's invention of television was years before RCA's."

Teaching Reading in Mathematics Corwin Press

Background: Teachers who work with English as a Second Language (ESL) students, struggle with promoting discussion during guided reading. When ESL students are asked

comprehension questions during group discussions and throughout the reading of a book, often teachers receive minimal feedback. Purpose: The purpose of this research is to identify effective discussion strategies that may help ESL students contribute to meaningful class discussions about their reading. Setting: The students in the research attended a public elementary school in a suburban neighborhood in northeastern United States. The research took place in a third grade classroom for approximately one month. Study Sample: The students in the research were two boys and two girls in third grade. They participated in the school's ESL program. Intervention: Anticipation guides were implemented during guided reading twice. Four statements were created on sheets of paper that related to the story with columns for students to decide whether they agreed or disagreed. Strategies were modeled to illustrate how students could respond to the first statement and how they could make connections to previous experiences. Students recorded their reactions to the statements, read the book, and had opportunities to discuss their responses. Research Design: Experimental. Data Collection and Analysis: The data collection includes a teacher survey and interview, guided reading pre & post observation notes, pre & post group discussion checklists, and student interviews. Findings: Anticipation guides brought forth high levels of discussion and were appreciated by the students, based on the student interviews and post strategy observation. It was easy for students to state their opinions on the statements included in the guides and refer back to them to discuss their reasons for agreeing or disagreeing. Conclusion: To narrow students' learning gaps, strategies that will allow for building background knowledge in students who bring diverse cultural differences should be implemented. Anticipation guides certainly build knowledge, motivation, comprehension, and discussion. Citation: Echevarria, J., & Short, D. (2004/2005). Teaching Reading in the Content Areas for Elementary Teachers Trafford Publishing

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general

public, including many parents, remains unaware. But The Knowledge Gap isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That's what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows the rules. No crying. No snitching. Revenge. That's where Will's now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother's gun. He gets on the elevator, seventh floor, stoked. He knows who he's after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that's when Will sees that one bullet is missing. And the only one who could have fired Shawn's gun was Shawn.

Huh. Will didn't know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck's in the elevator? Just as Will's trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck's cigarette. Will doesn't know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.
