Top Notch Interviews Simon and Schuster
 From the creator of the popular website **Ask a Manager** and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice!

There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say.

Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party

I am very much aware that it is an act of extreme rashness to attempt to write an elementary book about structures. Indeed it is only when the subject is stripped of its mathematics that one begins to realize how difficult it is to pin down and describe those structural concepts which are often called 'elementary'; by which I suppose we mean 'basic' or 'fundamental'. Some of the omis

sions and oversimplifications are intentional but no doubt some of them are due to my own brute ignorance and lack of understanding of the subject. Although this volume is more or less a sequel to The New Science of Strong Materials it can be read as an entirely separate book in its own right. For this reason a certain amount of repetition has been unavoidable in the earlier chapters. I have to thank a great many people for factual information, suggestions and for

stimulating and sometimes heated discussions. Among the living, my colleagues at Reading University have been generous with help, notably Professor W. D. Biggs (Professor of Building Technology), Dr Richard Chaplin, Dr Giorgio Jeronimidis, Dr Julian Vincent and Dr Henry Blyth; Professor Anthony Flew, Professor of Philosophy, made useful suggestions about the last chapter. I am also grateful to Mr John Bartlett, Consultant Neurosurgeon at the Brook Hospital. Professor T. P.

Hughes of the University of the West Indies has been helpful about rockets and many other things besides. My secretary, Mrs Jean Collins, was a great help in times of trouble. Mrs Nethercot of Vogue was kind to me about dressmaking. Mr Gerald Leach and also many of the editorial staff of Penguins have exercised their accustomed patience and helpfulness. Among the dead, I owe a great deal to Dr Mark Pryor - lately of Trinity College, Cambridge -

especially for discussions about biomechanics which extended over a period of nearly thirty years. Lastly, for reasons which must surely be obvious, I owe a humble oblation to Herodotus, once a citizen of Halicamassus. Expensive college degrees are seen by our society as a requirement to enter the American

workforce. Yet, many students fail to graduate with the skills and knowledge necessary to embark on a satisfying career path. The result is an unprepared individual, saddled with debt, and frustrated with a system that has left them hanging with respect to making good career decisions. . The concept of work-life balance continues to elude our society as thousands of workers complain of 'living to work' instead of 'working to live.' It's no secret that career satisfaction eludes

much of the American working population, but what's worse is the lack of resources and coaching to help today's employee find the career satisfaction they seek. In this innovative, step-by-step guide, workplace expert, professional development specialist, and nationally syndicated career advice columnist, J.T. O'Donnell (www.jtodonnell.com) unlocks the secrets to working smarter when it comes to creating a career you can get excited about. With more than 15 years

I had a decision to make: I could continue on the track to working my 9-5 job in front of a desk and let it define me and make me miserable, or look for something different. J.T.showed me that it's not your job that defines you at all;it's you who defines your job. She worked with me to figure out my strengths and work on my weaknesses. J.T.helped me learn that who I am is far more than the paycheck I bring in. Through that exploration of my own real desires, J.T.helped me to realize that I needed a far more creative outlet to be successful in. I can truly say that without J.T.'s help, I certainly would not be where I am today. I'm more aware of my life and the people in it...I absolutely love my job and really feel successful. I owe an immense amount of gratitude to J.T. for getting me to this place in my life. - Danielle H. The information in this book is so on target, I wish I'd found it earlier in my career.I can't begin to express what it is like to have finally found

not just the reasons, but the solutions, to my past career disappointments. - John T.
