A practice manual as well as an authoritative resource, Destruction of Evidence analyzes issues from the standpoints of civil litigation, criminal litigation, and the laws of professional responsibility. Destruction of Evidence also discusses in-depth such areas as: the spoliation inference the tort of spoliation discovery sanctions ethics, and routine destruction Also included is an expanded discussion of discovery sanctions, including procedural issues, choice-of-law considerations, the requirements for preserving sanctions issues for appellate review, burdens of proof, and appellate review. The supplement keeps you up to date on the continuing development of the controversial torts of both first- and third party spoliation of evidence: Massachusetts has declined to recognize a cause of action in tort for intentional or negligent spoliation of evidence The Supreme Court of Mississippi did not recognize an independent cause of action for the intentional spoliation of evidence against first or third party spoliators Nevada declined to recognize an independent tort spoliation of evidence when weighed against the andquot;potentially endless litigation over a speculative loss, and by the cost to society of promoting onerous record and evidence retention policiesandquot; Constitutional implications in the realm of criminal law. Many states within the last year have been addressing the potential for due process violations when evidence is destroyed and are continuing to adopt and expand the rules dictated by Brady, Trombetta, and Youngblood. While each of these new jurisdictions refused to find due process violation, this trend recognizes the increased potential for constitutional violations when evidence is destroyed: Hawaii refused to find a constitutional violation where a police officer failed to save her completed police report, citing Brady The Supreme Court of Mississippi ruled that a defendant was not denied due process by spoliation of crime scene evidence, citing Trombetta Nevada, using a bad faith standard, ruled that an independent laboratory's failure to refrigerate a defendant's blood sample did not violate due process A New Jersey court did not find a due process violation where the police had lost a videotape of the administration of breath tests for a DUI charge Oklahoma ruled that a defendant's due process rights were not violated when the police destroyed latent crime scene fingerprints, citing Youngblood Using an exculpatory evidence standard, the Supreme Court of South Dakota ruled that the State's release of a rape victim's vehicle without notice to the defendant did not violate the defendant's due process rights.

Presents the results of the first national field survey of how lawyers use pretrial discovery in practice. Pretrial discovery is a complex set of rules and practices through which the adversaries in a civil dispute are literally allowed to "discover" the facts and legal arguments their opponents plan to use in the trial, with the purpose of improving the speed and quality of justice by reducing the element of trickery and surprise. Dr. Glaser examines the uses, problems, and advantages of discovery. He concludes that it is in wide use in federal civil cases, but that while the procedure has produced more information in some areas, it has failed to bring other improvements favored by its original authors.
