Evolutionary Archaeology Cambridge University Press
“ [A] masterpiece . . . an astonishing book that will leave you questioning your own life and political views . . . Kidder opens a

window into Farmer ' s soul, letting the reader peek in and see what truly makes the good doctor tick. " —Nicholas Thomas, USA Today In medical school, Paul Farmer found his life ' s calling: to cure infectious diseases and to bring the lifesaving tools of modern medicine to those who need them most. Tracy Kidder ' s magnificent account shows how one person can make a difference in solving global health problems through a clear-eyed understanding of the interaction of politics, wealth, social systems, and

disease. Profound and powerful, Mountains Beyond Mountains takes us from Harvard to Haiti, Peru, Cuba, and Russia as Farmer changes people ' s minds through his dedication to the philosophy that " the only real nation is humanity. " Praise for Mountains Beyond Mountains " A true-to-life fairy tale, one that inspires you to believe in happy endings . . . Its stark sense of reality comes as much from the grit between the pages as from the pure gold those pages spin. " —Laura Claridge, Boston

Sunday Globe " Stunning . . . Mountains Beyond Mountains will move you, restore your faith in the ability of one person to make a difference in these increasingly maddening, dispiriting times. " —John Wilkens, The San Diego Union-Tribune " Easily the most fascinating, most entertaining and, yes, most inspiring work of nonfiction I ' ve read this year. " —Charles Matthews, San Jose Mercury News " It ' ll fill you equally with wonder and hope. " —Cathy Burke, People " In this excellent work,

Pulitzer Prize-winner
Kidder immerses
himself in and
beautifully explores
the rich drama that
exists in the life of
Dr. Paul Farmer. . .
. Throughout,
Kidder captures the
almost saintly effect
Farmer has on those
whom he treats. ”

Anthropological
Linguistics Martinus
Nijhoff Publishers
Few words have
generated as much
debate and
controversy as the
word race. Through a
critical examination of

this complex subject,
this anthology brings
together essential
contributions to the
study of race and
racialization. An
excellent compilation
of classic and
contemporary works
by academic and
activist writers, *Race
and Racialization*
provides historical,
comparative, and
global perspectives on
race and its
intersection with
gender, class, ethnicity,
indigeneity, and
sexuality. This well-
updated second
edition includes a new
section on state
multiculturalism and a
diverse ensemble of
Canadian and
international
contributors who
explore such relevant
themes as colonialism,
institutional racism,
ethnocentrism,
privilege,

marginalization, and
resistance. Featuring
introductions to each
piece written by the
editors, annotated lists
of supplementary
readings to encourage
further exploration,
and contributions by
activists from Idle No
More and Black Lives
Matter, this
comprehensive and
highly accessible
anthology is perfect for
students studying race,
racism, cultural
diversity, identity and
belonging, social
inequality, and social
justice.

Renewing the House World Scientific
Providing a critical framework for the consideration of the relationship between modern social anthropology and linguistics, this volume covers topics such as classification, symbolism, and structuralism. The relevance of the works of Saussure, Lévi-Strauss and Chomsky is considered. There are two case-studies:

the first outlines a 'social history' of the succession of pidgins that are documented on the West African coast, ending with Pidgin English. The second analyzes the status of three language varieties used in a 'trilingual' community in the Carnian Alps. Originally published in 1971. Anthropology Cambridge University Press
A classic and highly influential

ethnography, which explores political leadership among Swat Pathans - and which emphasizes the importance of individual decision-making for wider social processes. This study describes certain aspects of the society of the Pathans of the Swat valley in the North-West Frontier Province of Pakistan. Except where other reference is given, the material on which it is based was collected by the author in the period February-

November 1954. How the West Became Psychologically Peculiar and Particularly Prosperous Universal-Publishers Everything you need to navigate the IB Diploma Psychology course; ensure full coverage of the syllabus with a comprehensive guide to all the concepts, theories and research into approaches to understanding behaviour, presented with a cross-cultural focus for global thinkers. · Develop critical analysis skills with critical thinking boxes to draw out

methodological issues from studies, and the TOK feature to help you recognise debates and issues. · Apply new skills and knowledge to everyday life with examples and case studies. · Navigate your way seamlessly through the course with key studies and terms highlighted. · Assess your progress and learning with summaries at the end of each chapter. and diverse kinship structures, which are essential for the cultural identity of both indigenous groups and cultural minorities. The social construction of gender relations and gender conflicts is an important theme in many essays. Some of the essays examine the area of conflict between cultural practices and universal human rights standards. The demand for cultural rights may collide with human rights

standards, especially with the principles of gender equality. This volume will be of great interest to academics and to all those with practical involvement in the field of cultural pluralism. Previously published by VWGO Verlag in Austria, "Law and Anthropology" will be published and distributed by Martinus Nijhoff Publishers from Volume 7 onwards. New Economic Anthropology Cambridge

University Press
El doble carácter teóricoy empírico del trabajo antropológico exige un debate permanente tanto sobre los análisis de los estudios de caso particulares, como sobre las herramientas teóricas utilizadas en la investigación. Desde este convencimiento, el libro que aquí se presenta pretende aportar al debate antropológico tanto herramientas conceptuales

capaces de ofrecer aproximaciones útiles a las complejas problemáticas actuales, como ejemplos bien delimitados -cargados de teoría- que ilustren el quehacer del antropólogos sociales de Europa, preocupados precisamente por los retos más acuciantes de nuestras sociedades. Being theoretical and empirical at the same, the twofold character of anthropological work requires a permanent

debate both on the analysis of case studies and on the conceptual tools used for research. Therefore, the book presented here aims to contribute to the anthropological debate useful theoretical tools to approach today's urgent issues on the conceptual level, as well as empirical examples which - loaded with theory - illustrate the work of contemporary social anthropology. The current volume focuses

on the works of some of the most renowned European social anthropologists, precisely concerned about the most pressing challenges of our societies. Steven F.
Kruger argues
that medieval
Christian
identity was

destabilized by the living Talmudic tradition. Individual Jesuits who were critical to the success of contact in Japan are evaluated by Nakai Ayako. Linda Woodbridge argues that Elizabethan attitudes towards aboriginals paralleled their attitudes towards English vagrants. Despite a nod to Arcadian conventions, travel narratives of Virginia were preoccupied with finding wealth, according to

Paul W. DePasquale's research. Rick H. Lee examines the conflicting loyalties of Pierre Raddisson in the New World. Richard A. Young demonstrates that the Florida shipwreck narratives of Cabeza de Vaca were groomed for intended audiences, past and present. This rich interdisciplinary collaboration contributes to the debate on boundaries between disciplines, as well as boundaries between the

Middle Ages and the early modern period, and also between historical and theoretical perspectives. *Making Contact* draws our attention to the important ways in which historic encounters with contrasting 'others' have shaped the identities of both individual and corporate 'selves' over a span of five centuries. *Institutions and the Dissemination of Knowledge* Routledge A New York Times Notable Book of 2020 A Bloomberg Best

Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you 're rather psychologically peculiar. Unlike much of the world today, and most

people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In *The WEIRDest People in the World*, Joseph Henrich

draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman

Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, *The WEIRDest People in the World* explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-

scale social, political, and economic forces that drive human history. Includes black-and-white illustrations. *The Makings of Anthropology* Routledge The official Statutes and Ordinances of the University of Cambridge. [Mountains Beyond Mountains](#) Farrar, Straus and Giroux Building on the author's thirty-six years of experience with North Town, Texas, this second edition presents an ethnographic study of the ways the town's

youth learn traditional American values through participation in sports, membership in formal and informal social groups, dating, and interactions with teachers in the classroom. *International Business Canadian Scholars' Press* This book considers how the personal and the professional dimensions are related, and how they matter for aid work. The contributions

to this edited volume are based on the assumption that all actors are relevant in development, including national and international aid workers. A key question which the book explores is why the personal so often remains unacknowledged in development studies, even though its salience for aid workers is well-documented. One possible reason is an implicit

narrative of aid work as altruistic and self-sacrificing, which renders it inappropriate to devote much attention to the experiences of development professionals themselves. In order to redress this, this book critically considers the kind of difference they make, and aims to understand how they respond to the challenges of their work. The book explores their efficacy as human

beings and employees with individual subjectivities, social and cultural beliefs and practices, and documents how these shape their involvement in development processes. This book was published a special issue of *Third World Quarterly*. Statutes and Ordinances of the University of Cambridge 2009 ISD LLC The Encyclopedia of Prehistory, with regionally organized entries on each

major archaeological tradition, is a comprehensive overview of human history from two million years ago to the historic period. Prepared under the auspices and with the support of the Human Relations Area Files, and an internationally distinguished advisory board, the Encyclopedia is organized regionally with entries on each major archaeological tradition, written by noted experts in the field and edited by Peter N. Peregrine and Melvin Ember.

The volumes follow a standard format and employ comparable units of description and analysis, making them easy to use and compare.

-Volume 1 focuses on Africa. -Volume 2 focuses on Arctic and Sub Arctic. -Volume 3 focuses on East Asia and Oceania. -Volume 4 focuses on Europe. -Volume 5 focuses on Middle America. -Volume 6 focuses on North America. -Volume 7 focuses on South America.

-Volume 8 focuses on South & Southwest Asia. -Volume 9 is the index volume. Trajectories of Social Life in the Yucayeque (community) of El Cabo, Higüey, Dominican Republic, AD 800 to 1504 Routledge Anthropology, and by extension archaeology, has had a long-standing interest in evolution in one or several of its various guises. Pick up any lengthy treatise on humankind written in the last quarter of the nineteenth century and the chances are good

that the word evolution will appear somewhere in the text. If for some reason the word itself is absent, the odds are excellent that at least the concept of change over time will have a central role in the discussion. After one of the preeminent (and often vilified) social scientists of the nineteenth century, Herbert Spencer, popularized the term in the 1850s, evolution became more or less a household word, usually being used synonymously with change, albeit change over extended periods of time. Later, through the

writings of Edward Burnett Tylor, Lewis Henry Morgan, and others, the notion of evolution as it applies to stages of social and political development assumed a prominent position in anthropological discussions. To those with only a passing knowledge of American anthropology, it often appears that evolutionism in the early twentieth century went into a decline at the hands of Franz Boas and those of similar outlook, often termed particularists. However, it was not evolutionism

that was under attack but rather comparativism—an approach that used the ethnographic present as a key to understanding how and why past peoples lived the way they did (Boas 1896).
