Collecting, Managing, and Assessing Data Using Sample Surveys provides a thorough, step-by-step guide to the design and implementation of surveys. Beginning with a primer on basic statistics, the first half of the book takes readers on a comprehensive tour through the basics of survey design. Topics covered include the ethics of surveys, the design of survey procedures, the design of the survey instrument, how to write questions and how to draw representative samples. Having shown readers how to design surveys, the second half of the book discusses a number of issues surrounding their implementation, including repetitive surveys, the economics of surveys, web-based surveys, coding and data entry, data expansion and weighting, the issue of non-response, and the documenting and archiving of survey data. The book is an excellent introduction to the use of surveys for graduate students as well as a useful reference work for scholars and professionals.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

Despite the obvious importance of eyewitness information in criminal investigation, police receive surprisingly little instruction on how to conduct an effective interview with a cooperative eyewitness. More than half of police departments have no formal training whatsoever for newly appointed investigators. Most texts in police science either completely omit the issue of effective interviewing techniques or provide only superficial coverage. This manual provides guiding principles to effective interviewing, with specific techniques to be used and others to be avoided. There are principles of memory retrieval so that the reader will understand why to employ specific techniques -- for example, when to use open-ended versus direct short-answer questions, effective use of pauses, asking follow-up questions, cues to name and number recall, etc. There is the strategy of interview sequential structure -- that is, what to probe for at the beginning, middle, and end of the interview. Also included are practical exercises and real-world experiences. The book will also be helpful for attorneys in conducting investigative interviews.

Succeeding After Law School in the New Economy is a succinct book that takes the reader through the various components of a successful transition from being a law student to being a legal practitioner. Chapter by chapter, it conveys the attitudes and skills that are necessary for law school graduates to succeed in the current legal market. Carol Montgomery, recently retired Associate Dean for Career Development at The George Washington University Law School, spent 12 years advising law students and alumni about their career goals and job search strategies. She's worked extensively with employers in legal and non-legal sectors, as well as with law school career services professionals, and she has researched in depth what employers today are looking for. She is uniquely suited to help recent-or not so recent-law school graduates find employment in the new economy.

BASIC MARKETING RESEARCH, 9E balances a reader-friendly approach with an ideal level of coverage. The authors introduce two dominant approaches to gathering marketing information: marketing analytics on data that exist within the firm and customer insights gathered for a specific purpose. The book merges these approaches in an ongoing example in the analysis section. Readers review data from multiple sources, including consumer communication and consumer behavior observed through technology. An overview details how organizations obtain and use data today. Readers learn how interactions among parts of the research process give managers and researchers confidence in the results. Readers review the information-gathering function from the perspectives of researchers who gather

information and marketing managers who use it. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Information technology will be the most pervasive and important influence on individuals and organizations in the next 10 years.

Impression management is a growing field of study in the management and organizational sciences, which studies the self-presentational approach of individuals and the organizations. This collection of papers is both exploratory and innovative, examining new ways for the corporation to effect its strategy, its organizational design and its development as they are stimulated by the introduction and evolution of information technology. Understanding impression management theory as it moves further into the mainstream of research and practice is critical to corporate strategists, academics, and students.

In this text Etta Hollins presents a powerful process for developing a teaching perspective that embraces the centrality of culture in school learning. The six-part process covers objectifying culture, personalizing culture, inquiring about students' cultures and communities, applying knowledge about culture to teaching, formulating theory or a conceptual framework linking culture and school learning, and transforming professional practice to better meet the needs of students from different cultural and experiential backgrounds. All aspects of the process are interrelated and interdependent. Two basic procedures are employed in this process: constructing an operational definition of culture that reveals its deep meaning in cognition and learning, and applying the reflective-interpretive-inquiry (RIQ) approach to making linkages between students' cultural and experiential backgrounds and classroom instruction. Discussion within chapters is not intended to provide complete and final answers to the questions posed, but rather to generate discussion, critical thinking, and further investigation. Pedagogical Features Focus Questions at the beginning of each chapter assist the reader in identifying complex issues to be examined. Chapter Summaries provide a quick review of the main topics presented. Suggested Learning Experiences have been selected for their value in expanding preservice teachers' understanding of specific questions and issues raised in the chapter. Critical Readings lists extend the text to treat important issues in greater depth. New in the Second Edition New emphasis is placed on the power of social ideology in framing teachers' thinking and school practices. The relationship of core values and other important social values common in the United States to school practices is explicitly discussed. Discussion of racism includes an explanation of the relationship between institutionalized racism and personal beliefs and actions. Approaches to understanding and evaluating curriculum have been expanded to include different genres and dimensions of multicultural education. A framework for understanding cultural diversity in the classroom is presented. New emphasis is placed on participating in a community of practice. This book is primarily designed for preservice teachers in courses on multicultural education, social foundations of education, principles of education, and introduction to teaching. Inservice teachers and graduate students will find it equally useful.

Interviews are a frequent and important part of empirical research in political science, but graduate programs rarely offer discipline-specific training in selecting interviewees, conducting interviews, and using the data thus collected. Interview Research in Political Science addresses this vital need, offering hard-won advice for both graduate students and faculty members. The contributors to this book have worked in a variety of field locations and settings and have interviewed a wide array of informants, from government officials to members of rebel movements and victims of wartime violence, from lobbyists and corporate executives to workers and trade unionists. The authors encourage scholars from all subfields of political science to use interviews in their research, and they provide a set of lessons and tools for doing so. The book addresses how to construct a sample of interviewees; how to collect and report interview data; and how to address ethical considerations and the Institutional Review Board process. Other chapters discuss how to link interview-based evidence with causal claims; how to use proxy interviews or an interpreter to improve access; and how to structure interview questions. A useful appendix contains examples of consent documents, semistructured interview prompts, and interview protocols.
