Are we producing too many PhDs? Does the current graduate education system adequately prepare science and engineering students for today's marketplace? How do foreign students enter the picture? What should be the PhD of the future? These and other questions are addressed in this book by a blue-ribbon panel of scientists and engineers. Recommendations are aimed at creating a new PhD that would retain the existing strengths of the current system while substantially increasing the information available, the potential versatility of students, and the career options afforded to them by their PhD education.

On Being a Mentor to Students in Science and Engineering Basic Books

A schoolteacher still reeling from the tragedies of the Great War and the influenza epidemic travels to the Middle East in this memorable and passionate novel "Marvelous . . . a stirring story of personal awakening set against the background of a crucial moment in modern history." —The Washington Post Agnes Shanklin, a forty-year-old schoolteacher from Ohio, has come into a modest inheritance that allows her to take the trip of a lifetime to Egypt and the Holy Land. Arriving at the Semiramis Hotel just as the 1921 Cairo Peace Conference convenes, she is freed for the first time from her mother's withering influence and finds herself being wooed by a handsome, mysterious German. At the same time, Agnes—with her plainspoken American opinions—is drawn into the company of Winston Churchill, T. E. Lawrence, and Lady Gertrude Bell, who will, in the space of a few days, redraw the world map to create the modern Middle East. As they change history, Agnes too will find her own life transformed forever. With prose as graceful and effortless as a seductive float down the Nile, Mary Doria Russell illuminates the long, rich history of the Middle East with a story that brilliantly elucidates today's headlines.

The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

Training is an important tool to achieve and maintain the required competence of personnel working in nuclear facilities. Effective training and qualification of personnel are necessary for the achievement of high safety and efficiency standards in nuclear facility performance.

Training and qualification combined is a key feature of the integrated management systems of nuclear facilities. It is these considerations that led to this publication which consolidates the

experience gained worldwide using the systematic approach to training (SAT) for nuclear facility personnel. It provides a basis for establishing and sustaining the quality and reliability of training and qualification for all main categories of nuclear facility personnel. SAT has proved its effectiveness in nuclear and other safety critical industries over decades and is recognized as the best international practice in nuclear training. The publication details the processes and methodology, presents good practices and offers recommendations from the experts in the field on the entire set of activities within the SAT-based training methodology and provides examples of SAT application. It builds on, and supersedes, guidance provided in an earlier IAEA publication (Technical Report Series 380, Nuclear Power Plant Personnel Training and its Evaluation: A Guidebook). A key feature of this publication is demonstrating how SAT-based training serves as one of the important processes in a nuclear facility management system and how it integrates with other processes.

Yes, through this book you can do all the above and more! Welcome to the ultimate guide to unleashing your potential. This book aims to impart high-impact soft skills like executive presence, time management, public speaking, first impression, professionalism, etiquette, negotiation, job interview, group discussion, leadership, teamwork, communication, creativity, interpersonal skills, emotional intelligence, and much more. In a post Covid world, building a strong Online Presence has become a necessity. Whereas online meetings used to be optional, it is the norm now. A new chapter on Online Presence has been added to give the reader a competitive advantage in this new Virtual online space. A Good professional needs to have strong Language skills. Recognizing this need, the book has a section in every chapter that highlights important words and Business phrases used in the corporate industry along with their meanings. Hacks used for speed learning: Experts quotes | learning milestones | learning mastery: the essentials of the topic | case in point: real world examples for application of the concepts | illustrations and graphics | knowledge check | case studies | applied knowledge based on the case studies | business jargon and Start-up terminologies | English vocabulary building Here are a few questions our readers have asked the author. 1. I am very strong technically. Why must I learn soft skills? There is a popular saying: The first Impression is the last Impression. A good first impression that creates lifelong relationships is created through effective habits and an ability to say the right thing at the right time to the right person. To manage teams, to have good relationships with your bosses and leaders, to get the job and promotion of your dreams, it is important that we learn how to get soft skills. Formal education and technical certifications are not enough. Our technical experience is insufficient. That's where soft skills are important. Technical skills get you through the door, but soft skills help you progress upwards from floor to floor till you reach the corner office! 2. There are so many soft skills books already. What makes this one different? There are 3 main reasons why you should read this book: a. I have almost 20 years of Corporate, Business and Training experience. Starting my career as an Assistant manager with the Taj Hotels, I have experience as a founder of 3 start ups and over 15 years as a Life, Business and Executive Coach. The format of this book is entirely based on case studies experienced by me by interacting with thousands of clients and training sessions. b. Neuroscience is a very hot field right now with lots of applications in business. For the first time, I have shared new experiences and ideas on 'How to Promote Yourself' by using applied Neuroscience. I have shared how Neuromarketing helps you to handle difficult people, establish rapport and relationships and become expert people managers. c. This book highlights frequently committed mistakes by others, and suggests ways to avoid these. Life changing frameworks are showcased through case studies and examples. These help you to apply these easy methods immediately in your lives and most importantly become part of your basic nature. 3. What can I expect after reading this book? The book is like a GPS for the readers, who want to explore the quickest ways to reach their desired goals. There is no boring theory, no wasted time! It provides professionals who don't have a background on sales to effectively 'sell' their skills. The reader learns how to 'package' their verbal and non-verbal communication to influence others. Short bite-sized business storytelling has been used to keep the reader interested and energized and motivated to apply these skills in their own life. Building a strong Online Presence can make the crucial difference between cracking that interview, influencing unsure clients positively and making the best impression on key stakeholders. This book imparts easy hacks to becoming an online champion. 3. Any other tips for getting the maximum benefit from this book? I will encourage the reader to read a few pages at a time, then try to apply the solutions and come back and fine-tune their approach by reading a few more pages. Read this book over the course of 6-8 weeks for optimal results. To develop these skills, the reader should read about a chapter and guidelines on how to exhibit new behaviour without feeling shy or conscious. Once the reader begins to exhibit appropriate behaviour in all situations: personal and professional then sustained behavior becomes a habit. This then becomes part of the reader's basic nature. **WHAT YOU WILL LEARN** The book aims to provide the reader with a practical understanding of corporate and business life. It has been written by an experienced coach and industry professional with a real-world corporate perspective. **WHO THIS BOOK IS FOR** The book imparts proven coaching techniques and takes the reader on a journey towards exceptional leadership and management. Book helps the reader to apply it immediately in their lives and keep for life. **TABLE OF CONTENTS** 1. Soft Skills: An Overview 2. Emotional Intelligence 3. Self-Image Management 4. Team Building and Cooperation Teamwork, Conflict Management, Negotiation Skills 5. Time Management and Goal Setting 6. Communication Skills 7. Verbal Communication- Part 1 8. Aboriginal people are grossly over-represented before the courts and in our gaols. Despite numerous inquiries, State and Federal, and the considerable funds spent trying to understand this phenomenon, nothing has changed. Indigenous people continue to be apprehended, sentenced, incarcerated and die in gaols. One part of this depressing and seemingly inexorable process is the behaviour of police. Drawing on research from across Australia, Chris Cunneen focuses on how police and Aboriginal people interact in urban and rural environments. He explores police history and police culture, the nature of Aboriginal offending and the prevalence of over-policing, the use of police discretion, the particular circumstances of Aboriginal youth and Aboriginal women, the experience of community policing and the key police responses to Aboriginal issues. He traces the pressures on both sides of the equation brought by new political demands. In exploring these issues, *Conflict, Politics and Crime* argues that changing the nature of contemporary relations between Aboriginal people and the police is a key to altering Aboriginal over-representation in the criminal justice system, and a step towards the advancement of human rights.

From celebrated translator of the Hebrew Bible Robert Alter, the classic study of the Bible as literature, a winner of the National Jewish Book Award. Renowned critic and translator Robert Alter's *The Art of Biblical Narrative* has radically expanded our view of the Bible by recasting it as a work of literary art deserving studied criticism. In this seminal work, Alter describes how the Hebrew Bible's many authors used innovative literary styles and devices such as parallelism, contrastive dialogue, and narrative tempo to tell one of the most revolutionary stories of all time: the revelation of a single God. In so doing, Alter shows, these writers reshaped not only history, but also the art of storytelling itself.

Undergraduate research has a rich history, and many practicing researchers point to undergraduate research experiences (UREs) as crucial to their own career success. There are many ongoing efforts to improve undergraduate science, technology, engineering, and mathematics (STEM) education that focus on increasing the active engagement of students and decreasing traditional lecture-based teaching, and UREs have been proposed as a solution to these efforts and may be a key strategy for broadening participation in STEM. In light of the proposals questions have been asked about what is known about student participation in UREs, best practices in UREs design, and evidence of beneficial outcomes from UREs. *Undergraduate Research Experiences for STEM Students* provides a comprehensive overview of and insights about the current and rapidly evolving types of UREs, in an effort to improve understanding of the complexity of UREs in terms of their content, their surrounding context, the diversity of the student participants, and the opportunities for learning provided by a research experience. This study analyzes UREs by considering them as part of a learning system that is shaped by forces related to national policy, institutional leadership, and departmental culture, as well as by the interactions among faculty, other mentors, and students. The report provides a set of questions to be considered by those implementing UREs as well as an agenda for future research that can help answer questions about how UREs work

and which aspects of the experiences are most powerful.

This guide offers helpful advice on how teachers, administrators, and career advisers in science and engineering can become better mentors to their students. It starts with the premise that a successful mentor guides students in a variety of ways: by helping them get the most from their educational experience, by introducing them to and making them comfortable with a specific disciplinary culture, and by offering assistance with the search for suitable employment. Other topics covered in the guide include career planning, time management, writing development, and responsible scientific conduct. Also included is a valuable list of bibliographical and Internet resources on mentoring and related topics.
