When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. "You know something!" I would say if it could hear me. "Now tell it to us in language we can understand!" Since its publication in 2005, *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book*

is the idea that

revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often

overlooked, options, people themselves such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “author” to their curriculum vitae.

People have dreams which animate their lives. But are

dreams perhaps? Shakespeare said so in “The Tempest”: “we are the stuff dreams are made on.” Follow one family of dreamers, enthusiasts of social justice, Zionism, music and literature, who escape from pogrom-ravaged Russia to the challenges of pre-World War I Turkish Palestine, and then on to the safety and prosperity of America. Growing up in America, Leah Isaacson tries to balance her American identity with loyalty to the Zionism of her father, but her marriage to the anti-Zionist editor Pinya creates problems. The nightmare of the Hitler years changes Pinya, reconciling him to the Zionist dream. He creates a newspaper to support nascent Israel. The family joins in this

effort, linking their lives to the rebirth of a dream.

He demonstrates how to

use archives and libraries, read sources critically, present claims supported by evidence, tell compelling stories, and much more. G. K. Chesterton is

remembered as a brilliant creator of nonsense and satirical verse, author of the Father Brown stories and the innovative novel, *The Man who was Thursday*, and yet today he is not counted among the major English novelists and poets. However, this major new biography argues that Chesterton should be seen as the successor of the great Victorian prose writers, Carlyle, Arnold, Ruskin, and above all Newman. Chesterton's achievement as one of the great English literary critics has not hitherto been fully recognized, perhaps because his best literary criticism is of prose rather than poetry. Ian Ker remedies this neglect, paying particular attention to Chesterton's writings on the Victorians, especially Dickens. As a social and political thinker, Chesterton is contrasted here with contemporary intellectuals like Bernard Shaw and H.

G. Wells in his championing of democracy and the masses. Pre-eminently a controversialist, as revealed in his prolific journalistic output, he became a formidable apologist for Christianity and Catholicism, as well as a powerful satirist of anti-Catholicism. This full-length life of G. K. Chesterton is the first comprehensive biography of both the man and the writer. It draws on many unpublished letters and papers to evoke Chesterton's joyful humour, his humility and affinity to the common man, and his love of the ordinary things of life.

A Dissertation Guide for Professional Learners

Doctoral education has changed dramatically over the last three decades.

Traditionally, pursuit of a doctoral or research credential involved intense study at a large, traditional research university, and was reserved for those seeking careers in academia or research. The process of completing doctoral level work at traditional universities usually required a commitment to full time study, varied tremendously between institutions, and was often somewhat mysterious. Today, all this has changed. The emergence and growth of online education has led to a proliferation of doctoral learning possibilities for busy professionals. Individuals in the industry, nonprofit, and education are pursuing doctoral study as a means to advance their careers, increase their market value in the workplace, and establish their professional stature. If this sounds like you, then you have come to the right place. Recipes for Success is the book that will launch you on a successful quest for the doctoral degree. Dissertations are very personal endeavors and accomplishments, originating with problems and issues that are meaningful and important to the doctoral learner. These professionals are deeply grounded in their understanding of the issues and needs of their profession. Recipes build on this understanding, helping learners to discover and frame issues they are passionate about, and construct a credible and influential research study around this passion. While most dissertation guides focus largely or exclusively on the mechanics of writing and organization, Recipes approaches dissertation development as an iterative process of thinking and self-reflection that leads learners to discover what matters most to them and to their professions, and enables them to frame this meaning into a research problem and purpose, and to organize and execute a study design to fit, and thus solve the problem and achieve the purpose. From the very beginning of your doctoral journey to the ultimate achievement of degree completion, this book is your guide to the process and content of dissertation and research creation. In Recipes for Success, we articulate a process by which you can build the pieces of a successful and influential dissertation. Using a workbook approach rich in tools, templates, frameworks, examples, web integration, and hard-won lessons from experience, Recipes provides a friendly, easy to navigate process crafting issues and ideas into research and results. Based on our 40+ years of collective experience in the online educational setting, mentoring over 300 professional learners to success in completing their doctorates (including numerous award winners), we identify the most important factors for success and the traps to avoid. Whether you are considering doctoral study, are already in a doctoral program, or are working to develop and complete your dissertation, you will find Recipes for Success a key ingredient in your success as a doctoral learner. Our graduates tell us that Recipes is THE book that made a difference in their

doctoral career and success. YOU can do it too! Good luck on your doctoral journey!

In the past stars have been studied as cogs in a mass entertainment industry selling desires and ideologies. But since the 1970s, new approaches have reopened debate, as film and cultural studies try to account for the active role of the star in producing meanings, pleasures, and identities for a diversity of audiences. Stardom brings together for the first time some of the major writing of the last decade which seeks to understand the phenomenon of stars and stardom. Gathered under four headings - The System, Stars and Society, Performers and Signs, Desire and Politics - these essays represent a range of approaches drawn

from film history, sociology, textual analysis, audience research, psychoanalysis, and cultural politics. They raise important issues about the politics of representation and the cultural limitations and possibilities of stars.
