In cooperation with experts and practitioners throughout the SOA community, best-selling author Thomas Erl brings together the de facto catalog of design patterns for SOA and service-orientation. More than three years in development and subjected to numerous industry reviews, the 85 patterns in this full-color book provide the most successful and proven design techniques to overcoming the most common and critical problems to achieving modern-day SOA. Through numerous examples, individually documented pattern profiles, and over 400 color illustrations, this book provides in-depth coverage of:

- Patterns for the design, implementation, and governance of service inventories – collections of services representing individual service portfolios that can be independently modeled, designed, and evolved.
- Patterns specific to service-level architecture which pertain to a wide range of design areas, including contract design, security, legacy encapsulation, reliability, scalability, and a variety of implementation and governance issues.
- Service composition patterns that address the many aspects associated with combining services into aggregate distributed solutions, including topics such as runtime messaging and message design,

inter-service security controls, and transformation.

- Compound patterns (such as Enterprise Service Bus and Orchestration) and recommended pattern application sequences that establish foundational processes. The book begins by establishing SOA types that are referenced throughout the patterns and then form the basis of a final chapter that discusses the architectural impact of service-oriented computing in general. These chapters bookend the pattern catalog to provide a clear link between SOA design patterns, the strategic goals of service-oriented computing, different SOA types, and the service-orientation design paradigm. This book series is further supported by a series of resources sites, including soabooks.com, soaspecs.com, soapatterns.org, soamag.com, and soaposters.com.

Being a Municipal Officer or Municipal Official can be a challenging task in many of the small communities in Maine or any other state. Most of these positions are part time and do not draw the best of salaries. Unfortunately, there is little training and no certification requirements for these positions. In many cases, newly elected officers or elected/appointed officials depend on the past practices of their predecessors. These past practices may be OK or not OK and may not meet today ’ s standards. The budgets are much bigger and there are more state and federal laws/regulations to comply with. In the State of Maine, the Maine Municipal Association (MMA) offers some basic training/workshops and provides legal counsel for member communities for those that choose to participate. Many are not willing to spend the time in attending these training classes/workshops.
