YOU DON'T NEED TO GO TO THE CROSSROADS TO MAKE A DEAL WITH THE DEVIL. THE CROSSROADS WILL COME TO YOU. James 'Blue' Moon, the greatest living bluesman, was ten years old when he saw Robert Johnson playing on a street corner. Now, more than seventy years later, he's dying of cancer. His last wish is to reunite his estranged family - his soul-diva daughter Venetia Moon and his grandson, hip-hop mogul Calvin 'Ice Blue' Holland - for one final album. Enter his former protÃ©gÃ©, hapless British blues-rock superstar Mick Hudson, who has unfinished business with all three of them, plus a posse of vengeful gangstaz and a mysterious figure with whom Blue struck a deal one dark, bloody night at a haunted crossroads back in his native Mississippi Delta. It's a potent mix of secrets, nightmares and lies, spanning decades and continents. James 'Blue' Moon has one last chance to escape the hellhound on his trail ... if the cancer doesn't get him first. YOU NEVER GET OUT OF THESE BLUES ALIVE.

This easy-to-use reference not only provides you with a basic understanding of environmental sampling concepts, but it also provides you with the information you need to perform your tasks with ease and efficiency. Fundamentals of Environmental Sampling reviews key principles of geology and chemistry—information all samplers need to better understand the science of their work—covers major sampling media, and discusses how to choose the right equipment for each job. A list of "must have" tools is included in the author's recommended "Ideal Tool Kit."

[Theory of Sampling and Sampling Practice, Third Edition](#) Oswaal Books and Learning Private Limited

Crime scene investigation involves the use and integration of scientific methods, physical evidence, and deductive reasoning in order to determine and establish the series of events surrounding a crime. The quality of the immediate crime scene response and the manner in which the crime scene is examined are critical to the success of the investigation. Evidence that is missed or corrupted by incomplete or improper handling can have a devastating effect on a case and keep justice from being served. The Practice of Crime Scene Investigation covers numerous aspects of crime scene investigation, including the latest in education and training, quality systems accreditation, quality assurance, and the application of specialist scientific disciplines to crime. The book discusses a range of basic and advanced techniques such as fingerprinting, dealing with trauma victims, photofit technology, the role of the pathologist and ballistic expert, and signal processing. It also reviews specialist crime scene examinations including clandestine laboratories, drug operations, arson, and explosives.

[Metal Finishing](#) Pouring Oil on Fire: Interest Deductibility and Corporate Debt

This paper investigates the role of tax incentives towards debt finance in the buildup of leverage in the nonfinancial corporate (NFC) sector, using a large firm-level dataset. We find that so-called debt bias is a significant driver of leverage, for both small and medium-sized enterprises and larger firms, with its effect accounting for about a quarter of leverage. The strength of this effect differs with firm size, the availability of collateral, income and income volatility, cash flow, and capital intensity. We conclude that leveling the playing field between debt and equity finance through tax policy reform would decrease NFC leverage, reducing economic risks posed by leverage.

The twelve chapters of this volume aim to provide a complete manual for using noble gases in terrestrial geochemistry, covering applications which range from high temperature processes deep in the Earth's interior to tracing climatic variations using noble gases trapped in ice cores, groundwaters and modern sediments. Other chapters cover noble gases in crustal (aqueous, CO₂ and hydrocarbon) fluids and laboratory techniques for determining noble gas solubilities and diffusivities under geologically relevant conditions. Each chapter deals with the fundamentals of the analysis and interpretation of the data, detailing sampling

and sampling strategies, techniques for analysis, sources of error and their estimation, including data treatment and data interpretation using recent case studies.

When Jack Morgan opens the Mumbai branch of Private, the world's most elite detective agency, he hands the reins to top agent Santosh Wagh. Now, in this teeming metropolis of over thirteen million people where the guilty have everywhere to hide, Santosh goes on the hunt for one elusive killer. A killer who is targeting seemingly unconnected women and placing strange objects at their death scenes in a series of chilling rituals. As the Private team races to find a link that will lead them to the next victim, an unseen menace threatens to destroy the agency from within-and plunge the city into chaos. With countless lives hanging in the balance, Santosh must confront the demons of his past . . . before Private India meets an explosive end.
