This text integrates the theory and practice of learner-based assessment. Written in response to two recent movements in language teaching--learner-centered teaching and a renewed interest in authenticity in language testing--it examines the relationship between the language learner and language

assessment processes, and promotes approaches to assessment that involve the learner in the testing process. Particular attention is given to issues of reliability and validity. Grounded in current pedagogical applications of authentic assessment measures, this volume is intended for and eminently accessible to classroom teachers and program directors looking for ways to include their students in the evaluation process, graduate

students, and professional language testers seeking authenticity in assessment and desiring to create more interactive evaluation tools.

<p>• Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation’s history and current crisis. Americans have built an empire on the idea of “race,” a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and</p>	<p>murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates’s attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, home to the living rooms of mothers whose children’s lives were taken as</p>	<p>American plunder. The visionary author 's masterpiece pulls us—along with her Black female hero—through time

to face the horrors of slavery and explore the impacts of racism, sexism, and white supremacy then and now. Dana, a modern black woman, is celebrating her twenty-sixth birthday with her new husband when she is snatched abruptly from her home in California and transported to the antebellum South. Rufus, the white son of a plantation owner, is drowning, and Dana has been summoned to save him. Dana is drawn back repeatedly through time to the slave quarters, and each time the stay grows longer, more arduous, and more dangerous until it is uncertain whether or not Dana's life will end, long before it has a chance to begin. The “dazzling” and essential portrayal of 1960s America from the author of South and West and The Year of Magical Thinking (The New York Times). Capturing the tumultuous landscape of the United States, and in particular California, during a pivotal era of social change, the first work of nonfiction from one of American literature’s most distinctive prose stylists is a modern

classic. In twenty razor-sharp essays that redefined the art of journalism, National Book Award – winning author Joan Didion reports on a society gripped by a deep generational divide, from the “misplaced children” dropping acid in San Francisco’s Haight-Ashbury district to Hollywood legend John Wayne filming his first picture after a bout with cancer. She paints indelible portraits of reclusive billionaire Howard Hughes and folk singer Joan Baez, “a

personality before she was entirely a person, ” and takes readers on eye-opening journeys to Death Valley, Hawaii, and Las Vegas, “ the most extreme and allegorical of American settlements. ” First published in 1968, *Slouching Towards Bethlehem* has been heralded by the New York Times Book Review as “ a rare display of some of the best prose written today in this country ” and named to Time magazine ’ s list of the one hundred best and most influential nonfiction books. It is the definitive account of a terrifying and transformative decade in American history whose discordant reverberations continue to sound a half-century later. This text clearly presents a multitude of variables that potentially affect the results of neuropsychological tests. The chapter authors, all noted experts in their respective fields, begin with a general discussion of neuropsychological constructs known to impact performance on neuropsychological tests, including demographics, personality, and sociocultural factors. They then present an empirical approach to assessment. They focus on the disorders under

discussion (not solely the tests that might be used in diagnosis) and reflect the contributions the field has made to detecting differences in disorders that have neurological underpinnings. The disorders reviewed include dementia, HIV-related syndromes, adult seizure disorders, toxic exposure, mild to severe brain injury, and chronic fatigue syndrome.
