Not all welders are the same, and the kind of metal you're planning on welding together, the thickness of the metal, and the strength of the weld will all dictate what kind of welder you will use. What welders are there? The four main types of machines for bonding metal are MIG, TIG, stick, and spot welders.

semiautomatic DC constant voltage (wire) welder, 2) a DC manual (stick) welder, or 3) an AC welder with reduced open-circuit volt-age. In most situations, use of a DC, constant voltage wire welder is recommended. And, do not work alone! Disconnect input power or stop engine before installing or servicing this equipment.
