With U.S. intelligence agencies wracked by internal power struggles and paralyzed by bureaucracy, the president has been forced to establish his own clandestine group--Covert-One. It's activated only as a last resort, when the threat is on a global scale and time is running out. The Utopia Experiment When Dresner Industries unveils the Merge, a device that is destined to revolutionize the world and make the personal computer and smartphone obsolete, Covert-One operative Colonel Jon Smith is assigned to assess its military potential. He discovers that enhanced vision,

real-time battlefield displays, unbreakable security, and near-perfect marksmanship are only the beginning of a technology that will change the face of warfare forever--and one that must be kept out of the hands of America's enemies at all costs. Meanwhile, in the mountains of Afghanistan, CIA operative Randi Russell encounters an entire village of murdered Afghans--all equipped with enhanced Merge technology that even the Agency didn't know existed. As Smith and Russell delve into the circumstances surrounding the Afghans' deaths, they're quickly blocked by someone who seems to have access to the highest levels of the military--a person that even the president knows nothing about. Is the Merge really as secure as its creator claims? And what secrets about its development is the Pentagon so desperate to hide? Smith and Russell are determined to learn the truth. But they may pay for it with their lives . . .

In this stunning new book, *Unearthing Your Latent Potentials: Discovering the Gems of Your Subliminal-Self*, Ogonnaya Agom-Eze writes a compelling and immersive manifesto about our capacity to become more than we currently are. Who am I? What was I created to do? What do I do best? Have you ever pondered on the human capacity to become more? Do you ever ask yourself, "How can I surpass my status quo?" Do you, at times, wonder about the golden fleece of new possibilities buried in the depths of your subconscious? Do you ever rhetorically ask, "How do I go about discovering or re-discovering the gems of these new possibilities?" Many people struggle with these kinds of questions that probe into who they really are. While tackling these questions and more, Ogonnaya Agom-Eze in *Unearthing Your Latent Potentials* nudges readers to unearth the abilities hidden within the depths of their minds or subconscious by applying a systematic structure to the process of self-discovery. To do so, Agom-Eze leads the reader on a unique, structured, and methodic path of psychological self-discovery. He guides readers on using tools (i.e., SWOT Analysis Matrix and PDCA Cycle) best known to be applied by organizations to self-audit, strategize, and for taking transformative action steps to analyze the individual. In a well-woven tapestry of words, Agom-Eze weaves an insight-infused literary magnum opus that guides the mind on a colorful journey of potential discoveries. The pain point of many is that of uncertainty-many people struggle with the clarity of purpose when it comes to their innate capacity to do more with their known and unknown potentials, Agom-Eze

asserts. Because of fear, self-doubt, procrastination, giving up prematurely, and laziness, a lot of people end up living their lives below their maximum potentials. He establishes that what stands between you and your best self ever is your energy, perseverance, and your sheer willingness to try. *Unearthing Your Latent Potentials: Discovering the Gems of Your Subliminal-Self* is a self-reflective pause to dig deeper, discover, and uncover the gems of your best self ever-a habit you would never want to leave.

Twenty years ago I set out to photograph children all around the world. My first trip was to the south of India. I started in the province of Tamil Nadu, first living in a Church Women Centre in the city of Chennai, then in Mugaiyur, a small village. For six months I took pictures and had conversations with roommates, guides, and members of the families who had taken me in as a guest. I had very many questions, as did they. After children, the main subject was always love. Everything I heard from them and saw around me there filled me with both surprise and doubt, but above all with admiration. I admired their courage and faith. Their arranged marriages were a fascinating mystery to me. One way to understand arranged marriages was to make portraits. I photographed women and men various ages, engaged or planned couples and married couples.
