In 1978 Julian Richer, then aged just nineteen, opened his first shop near London Bridge. For over twenty years this shop has been listed in the Guinness Book of Records as having the highest sales per square foot of any retail outlet in the world, and the company as a whole, with its fifty-three stores nationwide and huge online presence, has become Britain ' s favourite retailer of TV and hi-fi equipment. What lies behind this extraordinary success? For Julian, the answer is simple: throughout his career he has focussed relentlessly on putting people – both staff and customers – right at the centre of his business. And in *The Richer Way*, he offers a supremely practical guide to how others can follow

suit. He explains how to motivate employees and measure their progress. He establishes how to balance company discipline with individual autonomy. He explores what ' customer service ' should really involve. Above all, he points the way to creating an open, friendly and flexible culture that will not only attract the best people but also offer the greatest chance of business success. Packed with straightforward, common-sense advice, *The Richer Way* will prove essential reading for all organisations, whatever their nature and size.

Kim Gordon, founding member of Sonic Youth, fashion icon, and role model for a generation of women, now tells her story—a memoir of life

---

as an artist, of music, marriage, motherhood, independence, and as one of the first women of rock and roll, written with the lyricism and haunting beauty of Patti Smith's *Just Kids*. Often described as aloof, Kim Gordon opens up as never before in *Girl in a Band*. Telling the story of her family, growing up in California in the '60s and '70s, her life in visual art, her move to New York City, the men in her life, her marriage, her relationship with her daughter, her music, and her band, *Girl in a Band* is a rich and beautifully written memoir. Gordon takes us back to the lost New York of the 1980s and '90s that gave rise to Sonic Youth, and the Alternative revolution in popular music. The band helped build a vocabulary of music—paving the way for Nirvana, Hole, Smashing Pumpkins and many other acts. But at its core, *Girl in a Band* examines the route from girl to woman in uncharted territory, music, art career, what partnership means—and what happens when that identity dissolves. Evocative and edgy, filled with the sights and sounds of a changing world and a transformative life, *Girl in a Band* is the fascinating chronicle of a remarkable journey and an extraordinary artist.

Companies are being forced to react to the growing individualization of demand. At the same time, cost management remains of paramount importance due to the competitive pressure in global markets. Thus, making enterprises more customer centric efficiently is a top management priority in most industries. Mass customization and personalization are key strategies to meet this challenge. Companies like Procter & Gamble, Lego, Nike, Adidas, Land's End, BMW, or Levi Strauss, among others, have started large-scale mass customization programs. This book provides insight into the different aspects of building a

customer centric enterprise. Following an interdisciplinary approach, leading scientists and practitioners share their findings, concepts, and strategies from the perspective of design, production engineering, logistics, technology and innovation management, customer behavior, as well as marketing.

This book argues that a conscientiously objecting medical professional should receive an exemption only if the grounds of an objector 's refusal are reasonable. It defends a detailed, contextual account of public reasonability suited for healthcare, which builds

---

from the overarching concept of Rawlsian public reason. The author analyzes the main competing positions and maintains that these other views fail precisely due to their systematic inattention to the grounding reasons behind a conscientious objection; he argues that any such view is plausible to the extent that it mimics the 'reason-giving requirement' for conscience objections defended in this work. Only reasonable objections can defeat the prior professional obligation to assign primacy to patient well-being, therefore one who refuses a patient's request for a legally available, medically indicated, and safe service must be able to explain the grounds of their objection in terms understandable to other citizens within the public institutional structure of medicine. The book further offers a novel policy proposal to deploy the Reasonability View: establishing conscientious objector status in medicine. It concludes that the Reasonability View is a viable and attractive position in this debate. A New Theory of Conscientious Objection in Medicine: Justification and Reasonability will be of interest to researchers and advanced students working in bioethics, medical ethics, and philosophy of

---

medicine, as well as thinkers interested in the intersections between law, medical humanities, and philosophy.

The Transportation Research Board (TRB) and the Division on Earth and Life Studies (DELS) have released the pre-publication version of TRB Special Report 290, *The Potential Impacts of Climate Change on U.S. Transportation*, which explores the consequences of climate change for U.S. transportation infrastructure and operations. The report provides an overview of the scientific consensus on the current and future climate changes of particular relevance to U.S. transportation, including the limits of present scientific understanding as to

their precise timing, magnitude, and geographic location; identifies potential impacts on U.S. transportation and adaptation options; and offers recommendations for both research and actions that can be taken to prepare for climate change. The book also summarizes previous work on strategies for reducing transportation-related emissions of carbon dioxide--the primary greenhouse gas--that contribute to climate change. Five commissioned papers used by the committee to help develop the report, a summary of the report, and a National Academies press release associated with the report are available online. DELS, like TRB, is a division of the National Academies, which include the National Academy of Sciences, National Academy of Engineering, Institute of Medicine, and National Research Council.

Barbed wire and gun emplacements cover the beaches. Historic buildings are commandeered. And the dance halls are in full swing with jazz, jitterbug and jive.
