The Samsung Galaxy S21 5G tested on Geekbench has a Snapdragon 888 processor paired with 8GB of RAM. Everything works under the control of Android 11. Of course, maybe with the new One UI 3.1 overlay. This update is also expected to hit the manufacturer's old smartphone. Geekbench results obtained by Samsung Galaxy S21 5G smartphones are not charming. In single core testing, Snapdragon 888 played more than a thousand points. However, in the multi-core benchmark it is close to 3,000 points. By comparison, Apple's 14 of the 12 iPhones generate about 1500 and 4000 points here. Expect better results in the latest version of the phone. The new phone is expected to come with exynos 2100 or Snapdragon 888 processor, depending on the country. Rumor has it the S21 and S21+ will have major telephoto cameras, ultrawide, and 12 megapixels. In turn, the Galaxy S21 Ultra will feature a 108 megapixel main sensor, another 12 megapixels with an ultrawide lens, plus two 10 MP sensors with 3x and 10x optical zoom. The Galaxy S21 and S21+ should also look similar in other aspects: a flat screen with Full HD + resolution and a refresh rate of 120 Hz, resizing only - 6.2 and 6.7 inches, respectively. In the meantime, the Ultra variant will maintain a display with curved edges from its predecessor: we expect to see a 6.8-inch panel with WQHD+ resolution and 120 Hz support. There is another difference on the S21 Ultra: it will be the only new phone with S Pen support; there will be no internal space to load the pen, and it is necessary to use a cloak to store it. Samsung is believed to be closing its Note line in 2021 and focusing on

---

folding phones with S Pen, such as the Galaxy Z Fold.
