Over the past decade, Internet technology, now merging into that of mobile technology, has transformed the multiple facets of life in society across the world, changing work and leisure patterns, and placing greater demands on us as active, democratic citizens. The Internet literacy handbook, intended for parents, teachers and young people throughout Europe, is a guide to exploiting to the fullest this complex network of information and communication. The handbook is comprised of 21 fact sheets, each covering a particular topic on Internet use, from searching for information to setting up blogs through to e-shopping and e-citizenship. These fact sheets offer teachers and parents sufficient technical know-how to allow them to share young people's and children's voyages through communication technology. They highlight ethical and safety considerations, give insight into added value in education, provide ideas for constructive activities in class or at home, share best practice in Internet use, and provide a wealth of definitions

and links to sites that give practical examples and further in-depth information.

Steve Jobs, adopted in infancy by a family in San Francisco, packed a lot of life into fifty-six short years. In this Who Was...? biography, children will learn how his obsession with computers and technology at an early age led him to co-found and run Apple, in addition to turning Pixar into a ground-breaking animation studio. A college dropout, Jobs took unconventional steps in his path to success and inspired the best and the brightest to come with him and "change the world."

Synthetic Worlds, Virtual Worlds, and Alternate Realities are all terms used to describe the phenomenon of computer-based, simulated environments in which users inhabit and interact via avatars. The best-known commercial applications are in the form of electronic gaming, and particularly in massively-multiplayer online role-playing games like World of Warcraft or Second Life. Less known, but possibly more important, is the rapid adoption of platforms in education and business, where Serious Games are being used for training purposes, and even Second Life is being used in many situations that formerly required travel. The editors of this book captures the state of research in the field intended to reflect the rapidly growing yet relatively young market in education and business. The general focus is set on the scientific community but integrates the practical applications for businesses, with papers on information systems, business models, and economics. In six parts, international authors – all experts in their field – discuss the current state-of-the-art of virtual worlds/alternate realities and how the field will develop over the next years. Chapters discuss the influences and impacts in and around virtual worlds. Part four is about education, with a focus on learning environments and experiences, pedagogical models, and the effects on the different roles in the educational sector. The book looks at business models and how companies can participate in virtual worlds while receiving a return on investment, and includes cases and scenarios of integration, from design, implementation to application.

Ha llegado la hora de crear valor para enriquecer vidas. Ha llegado la hora de que coloques ideas y proyectos en las seis canastas para innovar. Un libro para los emprendedores, ejecutivos de empresas, académicos, profesionistas, educadores, consultores, estudiantes, comerciantes, técnicos, amas de casa... y para todos aquellos preocupados por su futuro. En este momento, todos los convencionalismos son cuestionados, lo mismo en el arte que en la ciencia, la tecnología, la política, la religión, la familia, la economía, la educación. Nada quedará fuera. Con todo y que la incertidumbre hace que el presente se parezca cada vez menos al futuro, no hay ninguna razón para que el miedo nos paralice. Todas las predicciones serán inútiles. Lo importante es prepararnos. El mundo estuvo congelado en nuestras mentes por más de un siglo y ahora nos desafía para reinventarnos y pensar diferente. Hoy el imperativo no es crear o morir sino innovar y vivir. En un mundo que ha cambiado, el ser eficiente no será suficiente, debemos ir más allá de la mejora continua. Este libro ha sido escrito para servirte de guía en este desafío. Y para ello tendrás que promover una cultura que combine: - Creatividad continua. - Aseguramiento continuo. - Mejora continua. - Abandono continuo. - Innovación continua. - Lo que se traducirá en un crecimiento rentable y sustentable continuo.
