From the three-time Emmy nominated actor, climate activist, and author of *Soul Boom: Why We Need a Spiritual Revolution*—Rainn Wilson’s memoir is about growing up geeky and finally finding his place in comedy, faith, and life. For nine seasons Rainn Wilson played Dwight Schrute, everyone’s favorite work nemesis and beet farmer. Viewers of *The Office* fell in love with the character and grew to love the actor who played him even more. Rainn founded a website and media company, SoulPancake, that eventually became a bestselling book of the same name. He also started a hilarious Twitter feed (sample tweet: “I’m not on Facebook” is the new “I don’t even own a TV”) that now has more than four million followers. Now, he’s ready to tell his own story and explain how he came up with his incredibly unique sense of humor and perspective on life. He explains how he grew up “bone-numbingly nerdy before there was even a modicum of cool attached to the word.” *The Bassoon King* chronicles his journey from nerd to drama geek (“the highest rung on the vast, pimply ladder of high school losers”), his years of mild debauchery and struggles as a young actor in New York, his many adventures and insights about *The Office*, and finally, Wilson’s achievement of success and satisfaction, both in his career and spiritually, reconnecting with the artistic and creative values of the Bahá’í faith he grew up in.

This collection examines how the networked image establishes new social practices for the user and presents new challenges for cultural practitioners engaged in making, curating, teaching, exhibiting, archiving and preserving born-digital objects. The mode of vision and imaging, established through photography over the previous two centuries, has and continues to be radically reconfigured by a hybrid of algorithms, computing, programmed capture and display devices, and an array of online platforms. The image under these new conditions is filtered, fluid, fleeting, permeable, mobile and distributed and is changing our ways of seeing.

The chapters in this volume are the outcome of research conducted at the Centre for the Study of the Networked Image (CSNI) and its collaboration with The Photographers' Gallery over the last ten years. The book's contributors investigate radical changes in the meanings and values of hybridised media in socio-technical networks and speak to the creeping automation of culture through applications of AI, social media platforms and the financialisation of data. This interdisciplinary collection draws upon media and cultural studies, art history, art practice, photographic theory, user design, animation, museology and computer science as a way of making sense of the specific cultural consequences of the rapid succession of changes in image technologies and to bring the story up to date. It will be of particular interest to scholars and students of visual culture, media studies and photography.
