Blockchain technology is powering our future. As the technology behind cryptocurrencies like bitcoin and Facebook's Libra, open software platforms like Ethereum, and disruptive companies like Ripple, it's too important to ignore. In this revelatory book, Don Tapscott, the bestselling author of

Wikinomics, and his son, blockchain expert Alex Tapscott, bring us a brilliantly researched, highly readable, and essential book about the technology driving the future of the economy. Blockchain is the ingeniously simple, revolutionary protocol that allows transactions to be simultaneously anonymous and secure by maintaining a tamperproof public ledger of value. Though it's best known as the technology that drives bitcoin and other digital currencies, it also has the potential to go far beyond currency, to record virtually everything of value to humankind, from birth and death certificates to insurance claims, land titles, and even votes. Blockchain is also essential to understand if you're an artist who wants to make a living off your art, a consumer who wants to know where that hamburger meat really came from, an immigrant who's tired of paying big fees to send money home to your loved ones, or an entrepreneur looking for a new platform to build a business. And those examples are barely the tip of the iceberg. As with major paradigm shifts that preceded it, blockchain technology will create winners and losers. This book shines a light on where it can lead us in the next decade and beyond.

Over the past 100 years the European Automotive Industry has been repeatedly challenged by best practice. First by the United States, through the development of 'mass production' pioneered by Henry Ford and more recently by 'lean production techniques' as practised by the leading Japanese producers, particularly Toyota. It has consistently risen to these challenges and has shown it can compete and even outperform its competitors with world-class products. However, the European industry is now faced with growing competition and growth from new emerging low-cost countries and needs to re-define its competitive advantage to remain at the forefront of the sector. Automotive growth is driven by two factors, new markets and new technologies. Global competition is increasing, with technology and product differentiation becoming the most important sales factors, but with continued cost pressure. Within the

market the winners will be more profitable and the losers will disappear. The Automotive Industry makes a significant contribution to the socio-economic fabric of the European Union. Manufacturing output represents €700 billion and research and development spending €24 billion. European automotive suppliers number 5000 member companies and represent 5 million employees and generate €500 billion in revenues. These are significant figures that generate wealth and high value employment within the EU. European firms must consistently improve their competitive position to ensure that the industry does not migrate to growing new markets.

Almost 10 years ago the mineral-rich country of Mongolia experienced very rapid economic growth, fuelled by China ' s need for coal and copper. New

subjects, buildings, and businesses flourished, and future dreams were imagined and hoped for. This period of growth is, however, now over. Mongolia is instead facing high levels of public and private debt, conflicts over land and sovereignty, and a changed political climate that threatens its fragile democratic institutions. Subjective Lives and Economic Transformations in Mongolia details this complex story through the intimate lives of five women. Building on long-term friendships, which span over 20 years, Rebecca documents their personal journeys in an ever-shifting landscape. She reveals how these women use experiences of living a ' life in the gap ' to survive the hard reality between desired outcomes and their actual daily lives. In doing so, she offers a completely different picture from that presented by economists and statisticians of what it is like to live in this fluctuating extractive economy.

This second decade of the millennium finds the world changing at a once unimaginable pace. Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation.

Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and growth. We are currently experiencing a business era of turbulence and dynamic change – an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these

conditions. Across a multitude of sectors and organisational types, scholars of different business specialisations set the theoretical foundations of contemporary thinking and present their practical implementations.

"Cold calling is the lowest percentage of sales call success. If you invest the same amount of time in reading this book as you do in cold calling, your success percentage and your income will skyrocket."- Jeffrey Gitomer, Author, Little Red Book of Selling
"You can never get enough of a good thing! Read this book and USE its contents!"- Anthony Parinello, Author, Selling to Vito and Stop Cold Calling Forever
Salespeople everywhere are learning the hard way that cold calling doesn't work anymore. Yet, millions of salespeople are stuck in the past, using twentieth-century sales techniques to try to lure twenty-

first century customers. There has to be an easier way to find prospects - and there is. Today's most successful salespeople are using modern technology to bring prospects to them, rather than fishing for prospects over the phone or knocking on doors. Never Cold Call Again offers practical, step-by-step alternatives to traditional cold calling for salespeople, small business owners, and independent professionals who are actively building a client base. The Information Age presents endless opportunities for finding leads without cold calling. In fact, Frank Rumbauskas 's system brings prospects to the salesperson, rather than the other way around. Readers will find unbeatable sales advice on effective self-promotion, generating endless leads, how to win prospects using e-mail, prospecting on the Web, networking, developing effective proposals, and much more. Frank J. Rumbauskas Jr. (Phoenix, AZ) provides marketing

consultation and coaching services to firms who wish to provide qualified leads to their sales force rather than have them spend productive work time cold calling. He is the author of the self-published hit Cold Calling Is a Waste of Time (0-9765163-0-6).

India today is a vibrant free-market democracy, a nation well on its way to overcoming decades of widespread poverty. The nation 's rise is one of the great international stories of the late twentieth century, and in India Unbound the acclaimed columnist Gurcharan Das offers a sweeping economic history of India from independence to the new millennium. Das shows how India 's policies after 1947 condemned the nation to a hobbled economy until 1991, when the government instituted sweeping reforms that paved the way for extraordinary growth. Das traces these developments and tells the stories of the major players from Nehru through today. As the former

CEO of Proctor & Gamble India, Das offers a unique insider's perspective and he deftly interweaves memoir with history, creating a book that is at once vigorously analytical and vividly written. Impassioned, erudite, and eminently readable, *India Unbound* is a must for anyone interested in the global economy and its future.

Sugar Is Not Love Do you have a smart, creative, loving child who is also cranky, inattentive, and sometimes downright obnoxious? If you've written off this negative behavior as "typical" for your child's age—whether toddler or teen—stop and think: Does your child have a taste for soda, sugary breakfast cereals, and treats like candy and cookies? Does she eat regularly scheduled meals or skip them? What, exactly, does he drink and snack on throughout the day? Your child's behavior may be linked to diet—specifically to the sugar in obvious sources like sweets and soda and to hidden sugars that lurk in many foods, fruit-based drinks, and "healthy" snacks like granola bars.

And if your son or daughter is sugar sensitive, misbehavior and moodiness can be aggravated by missed or late meals and junk foods. Now, bestselling author Kathleen DesMaisons offers you a workable solution for getting back your child by changing his diet—without creating a sense of deprivation, without setting unrealistic goals, and without turning sugar into "forbidden fruit." This book offers:

- A step-by-step program, backed by years of research, for gradually improving the food your child eats—you and your whole family will benefit!
- Tips for navigating the sugar-laden world of birthday parties, holidays, and school cafeterias
- Ways to incorporate healthy snacking and regular mealtimes into your child's day, including suggestions for meals and snacks, plus recipes

Little Sugar Addicts isn't about strange foods, dramatic lifestyle changes, or complicated menus—just support, guidance, and real-life suggestions from other parents that work. It will help you make the connection between the addictive qualities of sugar and negative behavior and offer a healthy

solution you and your whole family can live with. From the Trade Paperback edition.
