The sales and marketing functions are increasingly converging, with lead generation now frequently arising from digital promotional campaigns, and the opportunities for tried and tested consultative sales techniques diminishing in the face of scarce customer attention and availability, as well as a plethora of readily accessible comparative product information. To take part in this process, salespeople need to understand and interact with customers via multiple channels, participating in social media in collaboration with marketing to influence purchasing decisions and convert contacts to

sales. Digital Selling makes sense of the new paradigms in which a salesperson now operates. It outlines the new strategies required to make the most of the plentiful opportunities that exist, and provides the practical advice salespeople need to use the social web effectively, generate leads and sell more. Packed with great advice for business people on engaging with their customers online and via social media, Digital Selling explains why embracing the social web is vital, how the sales role changes in a digital environment, the lead generation model in a digital world, how to build your online network and more. As such, sales professionals, digital sales directors, senior directors, SME owners and anyone required to make strategic decisions, implement programmes, and go out and sell seeking new ideas and ways to reach their markets will benefit from this straightforward and practical book from one of today's thought leaders on digital sales and marketing.

The digitization of healthcare has become almost ubiquitous in recent years, spreading from healthcare organizations into the homes and personal appliances of practically every citizen. Thanks to the collective efforts of health professionals, patients and care providers as well as systems developers and researchers, the entire population of Europe is able to participate in and enjoy the benefits of digitized health information. This book presents the proceedings of the 26th Medical Informatics in Europe Conference (MIE2015), held in Madrid, Spain, in May 2015. The conference brings together participants who share their latest achievements in biomedical and health Informatics, including the role of the user in digital healthcare, and provides a forum for discussion of the inherent challenges to design and adequately deploy ICT tools, the assessment of health IT interventions, the training of users and the exploitation of available information and knowledge to further the continuous and ubiquitous availability and interoperability of medical information systems. Contributions address methodologies and applications, success stories and lessons learned as well as an overview of on-going projects and directions for the future. The book will be of interest to all those involved in the development, delivery and consumption of health and care information.
