'Fighting Scholars' offers the first book-length overview of the ethnographic study of martial arts and combat sports. The book's main claim is that such activities represent privileged grounds to access different social dimensions, such as emotion, violence, pain, gender, ethnicity and religion. In order to explore these dimensions, the concept of 'habitus' is presented prominently as an epistemic remedy for the academic distant gaze of the effaced academic body. The book's most innovative features are its empirical focus and theoretical orientation. While ethnographic research is a widespread and popular approach within the social sciences, combat sports and martial arts have yet to be sufficiently interrogated from an ethnographic standpoint. The different contributions of this volume are aligned within the same project that began to crystallize in Loïc Wacquant's 'Body and Soul': the construction of a 'carnal sociology' that constitutes an exploration of the social world 'from' the body.

During the Second Sudanese Civil war, thousands of South Sudanese boys were displaced from their villages or orphaned in attacks from northern government troops. Many became refugees in Ethiopia. There, in 1989, teacher and community leader Mecak Ajang Alaak assumed care of the Lost Boys in a bid to protect them from becoming child soldiers. So began a four year journey from Ethiopia to Sudan and on to the safety of a Kenyan refugee camp. Together they endured starvation, animal attacks, and the horrors of land mines and aerial bombardments. To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, *Extreme Economies* turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.
