Mark Davison examines several legal models designed to protect databases, considering in particular the EU Directive, the history of its adoption and its transposition into national laws. He compares the Directive with a range of American legislative proposals, as well as the principles of misappropriation that underpin them. In addition, the book also contains a commentary on the appropriateness of the various models in the context of moves for an international agreement on the topic. This book will be of interest to academics and practitioners, including those involved with databases and other forms of new media.

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

Statistical investigation into technology not only provides a better understanding of the intrinsic features of the technology (analysis), but also leads to an improved design of the technology (synthesis). Physical principles and mathematical procedures of medical imaging technologies have been extensively studied during past decades. However, less work has been done on the statistical aspects of these techniques. Statistics of Medical Imaging fills this gap and provides a theoretical framework for statistical investigation into medical imaging technologies. Features Describes physical principles and mathematical procedures of two medical imaging techniques: X-ray CT and MRI Presents statistical properties of imaging data (measurements) at each stage in the imaging processes of X-ray CT and MRI Demonstrates image reconstruction as a transform from a set of random variables (imaging data) to another set of random variables (image data) Presents statistical properties of image data (pixel intensities) at three levels: a single pixel, any two pixels, and a group of pixels (a region) Provides two stochastic models for X-ray CT and MR image in terms of their statistics and two model-based statistical image analysis methods Evaluates statistical image analysis methods in terms of their detection, estimation, and classification performances Indicates that X-ray CT, MRI, PET and SPECT belong to a category of imaging: the non-diffraction computed tomography Rather than offering detailed descriptions of statistics of basic imaging protocols of X-ray CT and MRI, this book provides a method to conduct similar statistical investigations into more complicated imaging protocols.

Nothing is more important than worship. It is the theme of Scripture, the theme of eternity, and the theme of redemptive history— to worship the true and living and glorious God is the purpose of all creation. So why do we treat it as only what is sung or played in church on Sunday morning? Pastor John MacArthur leads you through Scripture texts about true worship. You will learn that worship is any essential expression of service rendered unto God by a soul that loves and extols Him for who He is. Worship is the nonstop role of believers, not merely part of a church service. So get ready to alter your priorities, aiming higher than entertaining worshipers on Sunday mornings. Worship shows that your ultimate priority must always be to worship the true and living God, with a radically different type of living.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Reveals the real, whole name of God and its place within each of us • Explains how none of the God-names commonly used in the Bible is God's real name • Shows how the real name of God unites all religions from both West and East • Includes spiritual techniques, prayers, poems, and meditative chants to bring each of us into deep, personal, intimate, living relationship with God Of the many names of God commonly used in the Bible and other sacred literature, none is God's real name. Every God-name, including YHWH, reflects only one of God's many aspects, such as the loving creator, the militaristic authoritarian, or the all-knowing judge. None embodies the wholeness, the totality, the full Essence of God. Who then are we to speak to when we seek God? If you can't truly know something until you know its name, how can we truly know God? The culmination of years of translation research and etymological investigation, Rabbi Wayne Dosick's work digs through many layers of presumption and deeply ingrained beliefs to reveal the real name of God hiding in plain sight in the Bible: Anochi. He shows how this sacred name unites all religions--both of the West and the East. The name Anochi enables us to finally meet the whole, complete, real God--both the grand God of the vast universe and the God of breath, soul, and heart who dwells within each of us. This in-depth exploration of God's name includes spiritual techniques, poems, guided prayers, and meditative chants to bring each of us into personal, intimate, and purposeful relationship with God. By knowing the real name of God, we can affirm the connection to the Divine at the core of our being. We can touch the face of God that resides deep within us all.

Drawing on more than 100 interviews, Vuic allows the nurses to tell their own captivating stories, from their reasons for joining the military to the physical and emotional demands of a horrific war and postwar debates about how to commemorate their service. Vuic also explores the gender issues that arose when a male-dominated army actively recruited and employed the services of 5,000 women nurses in the midst of a growing feminist movement and a changing nursing profession. Women drawn to the army's patriotic promise faced disturbing realities in the virtually all-male hospitals of South Vietnam. Men who joined the nurse corps ran headlong into the army's belief that women should nurse and men should fight.
