In recent years public expectations for rapid identification and prompt management of emerging drug safety issues have grown swiftly. Over a similar timeframe, the move from paper-based adverse event reporting systems to electronic capture and rapid transmission of data has resulted in the accrual of substantial datasets capable of complex analysis and querying by industry, regulators and other public health organizations. These two drivers have created a fertile environment for pharmacovigilance scientists, information technologists and statistical experts, working together, to deliver novel approaches to detect signals from these extensive and quickly growing datasets, and to manage them appropriately. In following this exciting story, this report looks at the practical consequences of these developments for pharmacovigilance practitioners. The report provides a comprehensive resource for those considering how to strengthen their pharmacovigilance systems and practices, and to give practical advice. But the report does not specify instant solutions. These will inevitably be situation specific and require careful consideration taking into account local needs. However, the CIOMS Working Group VIII is convinced that the combination of methods and a clear policy on the management of signals will strengthen current systems. Finally, in looking ahead, the report anticipates a number of ongoing developments, including techniques with wider applicability to other data forms than individual case reports. The ultimate test for pharmacovigilance systems is the demonstration of public health benefit and it is this test which signal detection methodologies need to meet if the expectations of all stakeholders are to be fulfilled.

Growing up on the Aegean Coast, Ozge loved the sea and imagined a life of adventure while her parents and society demanded predictability. Her dad expected Ozge, like her sister, to become an engineer. She tried to hear her own voice over his and the religious and militaristic tensions of Turkey and the conflicts between secularism and fundamentalism. Could she be a scuba diver like Jacques Cousteau? A stage actress? Would it

be possible to please everyone including herself? In her unpredictable and funny graphic memoir, Ozge recounts her story using inventive collages, weaving together images of the sea, politics, science, and friendship.

Drug Safety Data: How to Analyze, Summarize and Interpret to Determine Risk Routledge
Drug Safety Data: How to Analyze, Summarize and Interpret to Determine Risk was selected for The First Clinical Research Bookshelf - Essential reading for clinical research professionals by the Journal of Clinical Research Best Practices. Drug Safety Data: How to Analyze, Summarize and Interpret to Determine Risk provides drug safety/pharmacovigilance professionals, pharmaceutical and clinical research scientists, statisticians, programmers, medical writers, and technicians with an accessible, practical framework for the analysis, summary and interpretation of drug safety data. The only guide of its kind, Drug Safety Data: How to Analyze, Summarize and Interpret to Determine Risk is an invaluable reference for pre- and post-marketing risk assessment. With decades of pharmaceutical research and drug safety expertise, authors Dr. Klepper and Dr. Cobert discuss how quality planning, safety training, and data standardization result in significant cost, time, and resource savings. Through illustrative, step-by-step instruction, Drug Safety Data: How to Analyze, Summarize and Interpret to Determine Risk is the definitive guide to drug safety data analysis and reporting. Key features include: * Step-by-step instruction on how to analyze, summarize and interpret safety data for mandatory governmental safety reports * Pragmatic tips...and mistakes to avoid * Simple explanations of what safety data are collected, and what the data mean * Practical approaches to determining a drug effect and understanding its clinical significance * Guidance for determining risk throughout the lifecycle of a drug, biologic or nutraceutical * Examples of user-friendly data displays that enhance safety signal identification * Ways to improve data quality and reduce the time, resources and costs involved in mandatory safety reporting * Relevant material for the required training of drug safety/pharmacovigilance professionals * SPECIAL FEATURE: Actual examples of an Integrated Analysis of Safety (IAS) -used in the preparation of the Integrated Summary of Safety (ISS) and the Summary of Clinical Safety (SCS) reports -, and the Periodic Safety Update Report (PSUR)

Creating a New Medina Edward Elgar Publishing

Following the hidden lives of the global "1%", this book examines the networks, social practices, marriages, and machinations of the elite in Pakistan. In doing so, it reveals the daily, even mundane, ways in which elites contribute to and shape the inequality that characterizes the modern world. Operating in a rapidly developing economic environment, the experience of Pakistan's wealthiest and most powerful members contradicts widely held assumptions that economic growth is leading to increasingly impersonalized and globally standardized economic and political structures.

Information Economy Report 2012 St. Martin's Press

The multinational firm and its main vehicle, foreign direct investment, are key forces in economic globalization. Their importance to the world economy can be seen in the fact that since 1990 foreign direct investment has grown more rapidly than the world GDP and world trade. Despite this, the causes and consequences of multinational firm activity are little understood and until recently relatively unexamined in the theoretical literature. This CESifo volume fills this gap, examining the multinational enterprise (MNE) and foreign direct investment (FDI) from both theoretical and empirical perspectives. In the theoretical chapters, leading scholars take a wide range of modern analytical approaches—from new growth and trade theories to new economic geography, industrial organization, and game theory. Taking current theoretical work on MNE and FDI as a starting point and aiming to extend the existing theoretical framework, the contributors consider such topics as investment liberalization and firm location, tax competition, and welfare consequences of FDI and outsourcing. The empirical chapters test several of the key hypotheses of recent theoretical work on MNE and FDI, examining topics that include productivity effects on Italian MNEs, the different effects of outsourcing in Austria and Poland, location decisions of MNEs in the European Union, and other topics. Contributors Oscar Amerighi, Bruce A. Blonigen, Steven Brakman, Davide Castellani, Ronald B. Davies, Alan V. Deardorff, Fabrice Defever, Harry Garretsen, Anders N. Hoffman, Andzelika Lorentowicz, James R. Markusen, Charles van Marrewijk, Dalia Marin, James R. Markusen, Alireza Naghavi, Helen T. Naughton, Giorgio Barba Navaretti, J. Peter Neary, Gianmarco Ottaviano, Alexander Raubold, Glen R. Waddell Steven Brakman is Professor of Globalization in the Faculty of Economics at the University of Groningen. Harry Garretsen is Professor of International Economics at the Utrecht School of Economics, Utrecht University.

With the enormous growth of the internet and social media sites, digital marketing is now

worth more per annum than TV advertising in the UK. Social network advertising spending is expected to increase to a staggering \$4.3 billion in 2011 in a bid to attract today's media-savvy consumer. The Best Digital Marketing Campaigns in the World brings together an international collection of the most successful digital marketing campaigns of our time, assessing what they achieved and the business lessons learnt. This practical and insightful book explores how businesses large and small have harnessed social media, blogs, forums, online video and email to boost their brand and attract customers. Damian Ryan and Calvin Jones present a selection of hand-picked case studies, sharing the knowledge and skill of the world's top creative minds. Covering everything from household names such as Pizza Hut and Pepsi to Obama's 2008 presidential election campaign, this book is the must-read guide for all marketers looking to embrace the new digital landscape.

Seattle 100: Portrait of a City is the culmination of a two-year personal project by renowned photographer, filmmaker, and social artist Chase Jarvis. Both a creative project and an insightful ethnography, Seattle 100 shares—via more than 300 stunning black-and-white portraits and biographies of each subject—a curated collection of leading artists, musicians, writers, scientists, restaurateurs, DJs, developers, activists, entrepreneurs, filmmakers, and more, all of whom are defining and driving culture in Seattle. Some faces you will know, other names you may have heard in passing, and others will have been unknown to you until now. With this book, Jarvis has created a snapshot of a city's culture through its people. And it's inclusive. Descriptive rather than prescriptive. It's a 100, not an exclusive the 100, and it invites each of us to survey our own surroundings, our lives, our friends—and those not yet our friends—that make up the place we live, whether that's Seattle or anywhere else. Individually, the images and words here introduce you to 100 engaging and important people. Collectively, this portrait of a city tells a fascinating, interwoven story about a unique and vibrant place. Beyond the photos and commentary by Jarvis, there are pithy musings by a select handful of subjects on the topics of art, food, community, region, culture, and film. In addition, many of the subjects share their favorite things, places, and doings in and around the Seattle that they have explored, discovered, and rediscovered time and again. Chase Jarvis is donating 100% of his artist proceeds from this book to the amazing arts and culture organization www.4culture.org.

Highly Commended at the BMA Medical Book Awards 2015 Mann's Pharmacovigilance is the definitive reference for the science of detection, assessment, understanding and prevention of the adverse effects of medicines, including vaccines and biologics. Pharmacovigilance is increasingly important in improving drug safety for patients and reducing risk within the practice of pharmaceutical medicine. This new third edition covers the regulatory basis and the practice of pharmacovigilance and spontaneous adverse event reporting throughout the world. It examines signal detection and analysis, including the use of population-based databases and pharmacoepidemiological methodologies to proactively monitor for and assess safety signals. It includes chapters on drug safety practice in specific organ classes, special populations and special products, and new developments in the field. From an international team of expert editors and contributors, Mann's Pharmacovigilance is a reference for everyone working within pharmaceutical companies, contract research organisations and medicine regulatory agencies, and for all researchers and students of pharmaceutical medicine. The book has been renamed in honor of Professor Ronald Mann, whose vision and leadership brought the first two editions into being, and who dedicated his long career to improving the safety and safe use of medicines.

Jinnah: A Life Harvard Business Review (Hardc

"Discusses the fundamental assumptions regarding the foundations of Pakistani nationalism as well as our current understanding of the roots of its postcolonial identity crisis"--

Directory of Accredited Laboratories John Wiley & Sons

What does it mean "to dell?" This newly coined business verb means to mass-customize, making products only in response to actual demand. This allows a product to "go direct" to a customer, and it's what Dell Computer does instead of forcing mass-produced computers on its customers. And Dell's not alone. As Editors Jim Gilmore and Joe Pine point out in their introduction to Markets of One, mass customization is a trend that has caught on among consumer and business-to-business companies alike - think of Levi's jeans, Aramark's hospital services, Select Comfort mattresses, and Peapod or Streamline grocery delivery, to name a few. Companies customize their offerings to meet the unique needs of

individual customers so that nearly everyone can obtain exactly what they want at a reasonable price. It's a paradigm shift away from the one-size-fits-all way managers have thought about markets over the past century- today, every individual customer is a market of one. This collection of ten Harvard Business Review articles chronicles the evolution of business competition from mass markets to markets of one-in other words, from creating standardized value through mass production to creating customer-unique value through mass customization. The book examines many of the resulting changes in approach to strategy and operations-for example, moving from pushing products to fulfilling individual needs, from focusing solely on market share to measuring customer share, and from marketing to the masses to cultivating learning relationships with each customer. Markets of One offers the best of the leading thinkers on the topic, exploring both the promise and pitfalls of mass customization. Practical applications are presented with examples of leading companies who successfully mass customize for markets of one. A Harvard Business Review Book

Rethinking the National Security of Pakistan Simon and Schuster

Global value chains (GVCs) are a key feature of the global economy in the 21st century. They show how international investment and trade create cross-border production networks that link countries, firms and workers around the globe. This Handbook describes how GVCs arise and vary across industries and countries, and how they have evolved over time in response to economic and political forces. With chapters written by leading interdisciplinary scholars, the Handbook unpacks the key concepts of GVC governance and upgrading, and explores policy implications for advanced and developing economies alike. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial}

Strategy Is Your Words Thestreet.Com Ratings Incorporated

Despite the world's elation at the Arab Spring, shockingly little has changed politically in the Middle East; even frontliners Egypt and Tunisia continue to suffer repression, fixed elections, and bombings, while Syria descends into civil war. But in the midst of it all, a quieter revolution has begun to emerge, one that might ultimately do more to change the face of the region: entrepreneurship. As a seasoned angel investor in emerging markets, Christopher M. Schroeder was curious but skeptical about the future of investing in the Arab world. Travelling to Dubai, Cairo, Amman, Beirut, Istanbul, and even Damascus, he saw thousands of talented, successful, and intrepid entrepreneurs, all willing to face cultural, legal, and societal impediments inherent to their worlds. Equally important, he saw major private equity firms, venture capitalists, and tech companies like Google, Intel, Cisco, Yahoo, LinkedIn, and PayPal making significant bets, despite the uncertainty in the region. With *Startup Rising*, he marries his own observations with the predictions of these tech giants to offer a surprising and timely look at the second stealth revolution in the Middle East-one that promises to reinvent it as a center of innovation and progress.

If You Knew Suzy Titan Books (US, CA)

With almost twice as many chapters, this new edition of *Pediatric Retina* now includes important information on the development of the eye and retina, basic/translational science of retinal diseases in infants and children, telemedicine using wide-angle imaging for diagnosis and longitudinal management of infants and children, as well as international approaches to care with focus on retinopathy of prematurity.

Restoring the Soul of Business Notion Press

This title was first published in 2002. Policy-makers in South Asia, the Middle East and the Asian Pacific, decision-makers in the OECD countries, organizations and specialists in academe, will all find this publication indispensable. It presents an integrated model of national security that emphasizes military and non-military determinants. In the light of this model, it analyzes Pakistan's defence policies over the last half-century and proposes a radical reform of Pakistan's military organization. In addition to offering a comprehensive look at national security, this book provides coherent, interrelated analysis of the key issues such as political leadership, social and economic development and foreign policy.

Lessons Unlearned Farrar, Straus and Giroux (BYR)

Was Jinnah the sole driving force behind the Partition of India? Or was he a champion of Islam who stood for a new Islamic renaissance? Mahomed Ali Jinnah started his political career in the Congress as a staunch Indian nationalist. He believed in secular politics and was opposed to bringing religion into it. He was known as an ambassador of Hindu-Muslim unity. So why did he, towards the end of his career, initiate the creation of a separate Muslim-state? This new biography provides the answers while casting fresh light on Jinnah's character, his personal life, his political and legal careers, his relationship with Gandhi, Nehru as well as his disagreements with their ideas. Carefully examining the major events of his life – from early childhood to his first speech as President of the All India Muslim League – Yasser Latif Hamdani presents a complex and compelling portrait of Jinnah who is often narrowly regarded as a votary of a theocratic Islamic state. Based on

extensive research and a wealth of archival material, Hamdani has revealed those traits of Jinnah's personality that made him the most misunderstood leader of his times. He also comments on how religious zealots have turned Pakistan into an Islamic Republic contrary to Jinnah's vision.

SystemVerilog For Design United Nations Publications

What it's really like on the frontline of humanitarian aid It's the early 1990s and three young people are looking to change their lives, and perhaps also the world. Attracted to the ambitious global peacekeeping work of the UN, Andrew, Ken and Heidi's paths cross in Cambodia, from where their fates are to become inextricably bound. Over the coming years, their stories interweave through countries such as Rwanda, Bosnia, Somalia and Haiti - war-torn, lawless places where the intervention of the UN is needed like nowhere else. Driven by idealism, the three struggle to do the best they can, caught up in an increasingly tangled web of bureaucracy and ineffectual leadership. As disillusionment sets in, they attempt to keep hold of their humanity through black humour, revelry and 'emergency sex'. Brutal and moving in equal measure, *Emergency Sex (And Other Desperate Measures)* explores pressing global issues while never losing a sense of the personal. Deeply critical of the West's indifference to developing countries and the UN's repeated failure to intervene decisively, the book provoked massive controversy on its initial publication. Kofi Annan called for the book to be banned, and debate was sparked about the future direction of the UN. Brilliantly written and mordantly funny, it is a book that continues to make waves.

Mann's Pharmacovigilance Jones & Bartlett Publishers

SystemVerilog is a rich set of extensions to the IEEE 1364-2001 Verilog Hardware Description Language (Verilog HDL). These extensions address two major aspects of HDL based design. First, modeling very large designs with concise, accurate, and intuitive code. Second, writing high-level test programs to efficiently and effectively verify these large designs. This book, *SystemVerilog for Design*, addresses the first aspect of the SystemVerilog extensions to Verilog. Important modeling features are presented, such as two-state data types, enumerated types, user-defined types, structures, unions, and interfaces. Emphasis is placed on the proper usage of these enhancements for simulation and synthesis. A companion to this book, *SystemVerilog for Verification*, covers the second aspect of SystemVerilog.

Practical Aspects of Signal Detection in Pharmacovigilance MIT Press

An international literary event: Ten new stories from a beloved and award-winning author. This stunning collection of new stories demonstrates once again why Alice Munro is celebrated as a pre-eminent master of the short story. While some of the stories are traditional, set in "Alice Munro Country" in Ontario or in B.C., dealing with ordinary women's lives, others have a new, sharper edge. They involve child murders, strange sex, and a terrifying home invasion. By way of astonishing variety, the title story, set in Victorian Europe, follows the last journey from France to Sweden of a famous Russian mathematician. This daring, superb collection proves that Alice Munro will always surprise you.
