Little changes can make a big difference. When some of the world ’ s biggest corporations need to revive their brands, innovate products, and rethink their images, they call Peter Arnell. Now in his fourth decade of branding and marketing for such companies as Samsung, Reebok, DKNY, GNC, and Pepsi, Arnell explains how you can use some of the same strategies that famous brands do, in order to improve your own image, life, and career. Arnell knows this firsthand because he applied many of these same strategies to transform his own life by losing 256 pounds. How did he do it? Arnell created an idea he calls Shift. With Shift, you ’ ll discover the

steps you need to take in order to become the best you. Creating and revitalizing brands happens every day in business. Shift shows how you can make it happen for yourself and your personal brand. Innovative insights such as “ go helium ” are used by Arnell to explain how he reached his ultimate goal of 150 pounds—you can apply his techniques to reach for your own goals. You will see—through Arnell ’ s description of how he “ went tiger ” —how to exercise your own discipline and commitment, without apology, even if that means bucking the norm. And by learning to reach out to your brand audience, you will come to understand the importance of your network of friends, acquaintances, colleagues, and family—your fan club—in keeping you motivated and providing the feedback you need for success. Weaving together personal stories of his own transformation with stories about how he created transformative change for brands such as Reebok and Pepsi, Arnell shares his unique vision on how each of us can rebrand and transform ourselves, both personally and professionally, to achieve the success we desire.

PETER ARNELL, founder of Arnell, is one of the foremost branding and design experts in the world. Among the companies he and his team have worked with are DKNY, Samsung, Chanel, Reebok, Mars, Pepsi, Home Depot, GNC, De Tomaso, Fendi, Mikimoto, Special Olympics and Con Edison. He and his family live in Westchester County, New York.

Microwave Oven Sprint An evolutionary approach to re-envisioning our relationship with technology--and reclaiming health, happiness, and sanity in a plugged-in world Evolution shapes behaviors--and as a species, we've evolved to be drawn to the instant gratification, constant connectivity, and shiny lights, beeps, and sounds of our ever-present smartphones, laptops, and other devices. In earlier eras, these hardwired evolutionary patterns may have set us up for success, but today they confuse our instincts, leaving us vulnerable and stressed out from fractured attention, missed sleep, skipped meals, and all-over aches and pains. So how can we avoid the evolutionary pitfalls programmed into modern technology use? Erik Peper, Richard Harvey, and Nancy Faass offer real, practical tools to avoid the evolutionary traps that trip us up, helping us reduce physical strain, prevent sore muscles, combat brain drain, and correct poor posture. They first describe some of the problems associated with technology overuse, then offer strategies for mitigating technological stress, like how to:

- Increase patience and calm while working at a computer
- Improve communication with spouses, children, and co-workers during digital device usage
- Arrange your work environment to best match your individual needs
- Reduce hypervigilance and excessive cortisol production while using digital devices
- Limit the bracing and freezing responses under stress that lead to 'blanking out' or not remembering details
- Cultivate a sense of safety under conditions of workplace threat
