Robert E. Lee was a leader for the ages. The man heralded by Winston Churchill as "one of the noblest Americans who ever lived" inspired an out-manned, out-gunned army to achieve greatness on the battlefield. He was a brilliant strategist and a man of unyielding courage who, in the face of insurmountable odds, nearly changed forever the course of history. "A masterpiece—the best work of its kind I have ever read. Crocker's Lee is a Lee for all leaders to study; and to work, quite deliberately, to emulate." — Major General Josiah Bunting III, superintendent of the Virginia Military Institute In this remarkable book, you'll learn the keys to Lee's greatness as a man and a leader. You'll find a general whose standards for personal excellence was second to none, whose leadership was founded on the highest moral principles, and whose character was made of steel. You'll see how he remade a rag-tag bunch of men into one of the most impressive fighting forces history has ever known. You'll also discover other sides of Lee—the businessman who inherited the debt-ridden Arlington plantation and streamlined its operations, the teacher who took a backwater college and made

it into a prestigious university, and the motivator who inspired those he led to achieve more than they ever dreamed possible. Each chapter concludes with the extraordinary lessons learned, which can be applied not only to your professional life, but also to your private life as well. Today's business world requires leaders of uncommon excellence who can overcome the cold brutality of constant change. Robert E. Lee was such a leader. He triumphed over challenges people in business face every day. Guided by his magnificent example, so can you. Risk Analysis VI Springer Science & Business Media

It was among the most notorious criminal cases of its day. On August 11, 1921, in Birmingham, Alabama, a Methodist minister named Edwin Stephenson shot and killed a Catholic priest, James Coyle, in broad daylight and in front of numerous witnesses. The killer's motive? The priest had married Stephenson's eighteen-year-old daughter Ruth to Pedro Gussman, a Puerto Rican migrant and practicing Catholic. Sharon Davies's *Rising Road* resurrects the murder of Father Coyle and the trial of his killer. As Davies reveals with novelistic richness, Stephenson's crime laid bare the most potent bigotries of the age: a hatred not only of blacks, but of Catholics and "foreigners" as well. In one of the case's most unexpected turns, the minister hired future U.S. Supreme

Court Justice Hugo Black to lead his defense. Though regarded later in life as a civil rights champion, in 1921 Black was just months away from donning the robes of the Ku Klux Klan, the secret order that financed Stephenson's defense. Entering a plea of temporary insanity, Black defended the minister on claims that the Catholics had robbed Ruth away from her true Protestant faith, and that her Puerto Rican husband was actually black. Placing the story in social and historical context, Davies brings this heinous crime and its aftermath back to life, in a brilliant and engrossing examination of the wages of prejudice and a trial that shook the nation at the height of Jim Crow. "Davies takes us deep into the dark heart of the Jim Crow South, where she uncovers a searing story of love, faith, bigotry and violence. *Rising Road* is a history so powerful, so compelling it stays with you long after you've finished its final page." --Kevin Boyle, author of the National Book Award-winning *Arc of Justice* "This gripping history...has all the makings of a Hollywood movie. Drama aside, *Rising Road* also happens to be a fine work of history." --History News Network

With U.S. intelligence agencies wracked by internal power struggles and paralyzed by bureaucracy, the president has been forced to establish his own clandestine group--Covert-One. It's activated only as a last resort, when the threat is on a global scale and time is running out. *The Utopia Experiment* When Dresner Industries unveils the Merge, a device that is destined to revolutionize the world and

make the personal computer and smartphone obsolete, Covert-One operative Colonel Jon Smith is assigned to assess its military potential. He discovers that enhanced vision, real-time battlefield displays, unbreakable security, and near-perfect marksmanship are only the beginning of a technology that will change the face of warfare forever--and one that must be kept out of the hands of America's enemies at all costs. Meanwhile, in the mountains of Afghanistan, CIA operative Randi Russell encounters an entire village of murdered Afghans--all equipped with enhanced Merge technology that even the Agency didn't know existed. As Smith and Russell delve into the circumstances surrounding the Afghans' deaths, they're quickly blocked by someone who seems to have access to the highest levels of the military--a person that even the president knows nothing about. Is the Merge really as secure as its creator claims? And what secrets about its development is the Pentagon so desperate to hide? Smith and Russell are determined to learn the truth. But they may pay for it with their lives . . .

This text is a biography of Robert Duncan,

one of America's great postwar poets. The author takes the reader from Duncan's birth in Oakland, California, through his childhood in an eccentrically Theosophist household, to his life in San Francisco as an openly gay man who became an inspirational figure for many poets and painters around him.--(Source of description unspecified.)

Why do some things pass under the radar of our attention, but other things capture our interest? Why do some

religions catch on and others fade away? What makes a story, a movie, or a book riveting? Why do some people keep watching the news even though it makes them anxious? The past 20 years have seen a remarkable flourishing of scientific research into exactly these kinds of questions. Professor Jim Davies' fascinating and highly accessible book, *Riveted*, reveals the evolutionary underpinnings of why we find things compelling, from art to religion and from sports to superstition. Compelling things fit our minds like keys in the ignition, turning us on and keeping us running, and yet we are often unaware of what makes these "keys" fit. What we like and don't like is almost always determined by subconscious forces, and when we try to consciously predict our own preferences we're often wrong. In one study of speed dating, people were asked what kinds of partners they found attractive. When the results came back, the participants' answers before the exercise had no correlation with who they actually found attractive in person! We are beginning to understand just how much the brain makes our decisions for us: we are rewarded with a rush of pleasure when we detect patterns, as the brain thinks we've discovered something significant; the mind urges us to linger on the news channel or rubberneck an accident in case it might pick up important survival information; it even pushes us to pick up People magazine in order to find out about changes in the social structure. Drawing on work from philosophy, anthropology, religious studies, psychology, economics,

computer science, and biology, Davies offers a comprehensive explanation to show that in spite of the differences between the many things that we find compelling, they have similar effects on our minds and brains.

Rizzo's War, Lou Manfredi's stunningly authentic debut, partners a rookie detective with a seasoned veteran on his way to retirement in Bensonhurst, Brooklyn. "There's no wrong, there's no right, there just is." This is the refrain of Joe Rizzo, a decades-long veteran of the NYPD, as he passes on the knowledge of his years of experience to his ambitious new partner, Mike McQueen, over a year of riding together as detectives in the Sixty-second Precinct in Bensonhurst, Brooklyn. McQueen is fresh from the beat in Manhattan, and Bensonhurst might as well be China for how different it is. They work on several cases, some big, some small, but the lesson is always the same. Whether it's a simple robbery or an attempted assault, Rizzo's saying always seems to bear out. When the two detectives are given the delicate task of finding and returning the runaway daughter of a city councilman, who may or may not be more interested in something his daughter has taken with her than in her safety, the situation is much more complex. By the end of Rizzo and McQueen's year together, however, McQueen is not surprised to discover that even in those more complicated cases, Rizzo is still right—there's no wrong, there's no right, there just is. Rizzo's War is an introduction to a wonderful new voice in

crime fiction in the Big Apple, ringing with authenticity, full of personality, and taut with the suspense of real, everyday life in the big city.

Pulitzer Prize-winning author John McPhee continues his Annals of the Former World series about the geology of North America along the fortieth parallel with *Rising from the Plains*. This third volume presents another exciting geological excursion with an engaging account of life—past and present—in the high plains of Wyoming. Sometimes it is said of geologists that they reflect in their professional styles the sort of country in which they grew up. Nowhere could that be more true than in the life of a geologist born in the center of Wyoming and raised on an isolated ranch. This is the story of that ranch, soon after the turn of the twentieth century, and of David Love, the geologist who grew up there, at home with the composition of the high country in the way that someone growing up in a coastal harbor would be at home with the vagaries of the sea.

In April 1991, in a little Wisconsin town about a hundred miles southwest of the town where I grew up, a misfit boy was kidnapped by a group of high school kids who, later, would testify they'd merely meant to frighten him, to drive him around for a while. Somehow they ended up at the river, whooping and hollering on a two-lane bridge. Somehow the boy was shoved, he jumped, he slipped—accounts vary—into the icy water. The kids told police they never heard a splash; one reported seeing a brilliant flash of light. (Several people in the area witnessed a similar light, while others recalled hearing something "kind of like thunder.") All night, volunteers walked the river's edge, but it was dawn before the body was found in a barn a good mile from the bridge . . . The owner of the barn had been the one to discover the body, and she

said the boy's cheeks were rosy, his skin warm to the touch. A sweet smell hung in the air. "It was," she said "as if he were just sleeping." And then she told police she believed an angel had carried him there. For years, it had been said that an angel lived in the river. Residents flipped coins into the water for luck, and a few claimed they had seen the angel, or known someone who'd seen it. The historical society downtown had a farmwife's journal, dated 1898, in which a woman described how an angel had rescued her family from a flood. Now, as the story of the boy's death spread, more people came forward with accounts of strange things that had happened on that night. Dogs had barked without ceasing till dawn; livestock broke free of padlocked barns. Someone's child crayoned a bridge and, above it, a wide-winged tapioca angel. A miracle? A hoax? Or something in between? With acute insight and great compassion, A. Manette Ansay captures the inner life of a town and its residents struggling to forge a new identity in the face of a rapidly changing world.
