Samsung Galaxy Yale University Press

Research on the frontiers of urban studies was the subject of a conference

on nineteenth-century cities held in November 1968 at Yale University.

These papers from the conference attempt to define what is coming to be known as the "new urban history." The cities studied range from small communities - such as Springfield, Massachusetts, and Poughkeepsie, New York - to giants like Philadelphia, Chicago, and Boston. While the majority of the contributions deal with American cities, four essays examine cities in Canada, England, France, and Colombia. The studies focus on the dimensions of mobility and stability in the social structure of nineteenth-century cities. Within this general frame, the essays explore such areas as urban patterns of class stratification, changing rates of occupational and residential mobility, social origins of particular elite groups, the relations between political control and social class, differences in opportunities for various ethnic groups, and the relationships between family structure and city life. In all these fields, the authors relate sociological theory to the historical materials; a complex yet readable, interdisciplinary portrait of the origins of modern city life is the result.

The Higher Learning in America

Thorstein Veblen was an American economist and sociologist. He is well known as a witty critic of capitalism. Veblen is famous for the idea of "conspicuous consumption." Conspicuous consumption, along with "conspicuous leisure," is performed to demonstrate wealth or mark social status. Veblen explains the concept in his best-known book, *The Theory of the Leisure Class*. Within the history of economic thought, Veblen is considered the leader of the institutional economics movement. Veblen's distinction between "institutions" and

"technology" is still called the Veblenian dichotomy by contemporary economists. In the beginning of his academic career Veblen had difficulties obtaining a university position, whether because he was discriminated for being Norwegian, or openly identified as an agnostic. These difficulties later inspired him to write *The Higher Learning in America*. In this book he claimed that true academic values were sacrificed by universities in favor of their own self-interest and profitability.
