The wildly inventive debut collection of stories by the Oscar-nominated star of *The Social Network*. "Hilarious . . . It's a hoot" (People, The Best New Books). Jesse Eisenberg, known for his iconic film roles, his regular pieces in the *New Yorker* and two critically acclaimed plays, proves himself "a deeply original comic voice" in these 28 stories "about the funniness, sadness, and strangeness of everyday life and they really made me laugh" (Roz Chast). Moving from contemporary LA to the dorm rooms of an American college to ancient Pompeii, Eisenberg throws the reader into a universe of social misfits, reimagined scenes from history, and ridiculous overreactions; a college freshman forced to live with a roommate is stunned when one of her ramen packets goes missing ("She didn't have 'one' of my ramens. She had a chicken ramen."); Alexander Graham Bell has teething problems with his invention ("I've been calling Mabel all day, she doesn't pick up! Yes, of course I dialed the right number—2!"); and in the title story, a precocious and privileged nine-year-old boy finds himself in the uncomfortable position as an amateur restaurant critic. Featuring illustrations by award-winning cartoonist Jean Jillian, this "alphabet soup of sketches, riffs, and innovations" (Seattle Times) explores the various insanities of the modern world, "playfully bringing both familiar and wholly original scenarios to life" (Marie Claire). Designed as one of the first true textbooks on how to use the UNIX operating system and suitable for a wide variety of UNIX-based courses, UNIX and Shell Programming goes beyond providing a reference of commands to offer a guide to basic commands and shell programming. Forouzan/Gilberg begin by introducing students to basic commands and tools of the powerful UNIX operating system. The authors then present simple scripting concepts, and cover all material required for understanding shells (e.g., Regular Expressions, grep, sed, and awk) before introducing material on the Korn, C, and Bourne shells. Throughout, in-text learning aids encourage active learning and rich visuals support concept presentation. For example, sessions use color so students can easily distinguish user input from computer output. In addition, illustrative figures help student visualize what the command is doing. Each chapter concludes with problems, including lab sessions where students work on the computer and complete sessions step-by-step. This approach has proven to be successful when teaching this material in the classroom.

Britain, in the mid 21st century. A new prime minister, Lev Solokov is elected. In spite of his Russian surname, he is the charismatic politician who, on the surface, appears to be just what Britain needs. But he's not what Gavin needs. Gavin is a Pustoy, a human who, among countless others, Solokov's researchers has declared a soulless, subhuman race. Solokov joins a dark lineage of genocidal tyrants that have gone before him. In synthesizing his own race to persecute others, perhaps he has succeeded in a horror more insidious than any of his forebears, especially as he appears to have done so with both overwhelming public blessing and encouragement. Or at least he would have, if not for the increasing din of the Pustoy protesting outside his offices. Chosen at random owing to his position as a forefront campaigner for the rights of the Pustoy, Gavin is framed for a crime he didn't commit and is forced to go on the run, and so Solokov in one fell swoop kills any budding sympathy the people may have had for the Pustoy, and would appear to have silenced one of his loudest protestors. Just who are the Pustoy of this world? The persecutors or the persecuted? Will Gavin remain a hunted scapegoat? Is Solokov acting for the greater good; are the Pustoy really devoid of a soul? More importantly, how far away is this future, really? Phillipe Blenkiron's conceptual poetry collection demands these questions of the reader, whilst offering an unflinching examination of the human psyche, exploring the clouded moral hues between black and white, between right and wrong, that exist inside all of us. For fans of "1984," "Brave New World," and other greats of dystopian fiction, Philippe Blenkiron's debut poetry collection is shocking, unsettling, and closer to real-life than we dare admit...

Suggs is one of pop music's most enduring and likeable figures. Written with the assured style and wit of a natural raconteur, this hugely entertaining and insightful autobiography takes you from his colorful early life on a North London council estate, through the heady early days of Punk and 2-Tone, to the eighties, where Madness became the biggest selling singles band of the decade. Along the way he tells you what it's like to grow up in sixties Soho, go globetrotting with your best mates, to make a dead pigeon fly and cause an earthquake in Finsbury Park.
