Since the late 1980s, Catherine Opie's interest in the motif of the visual road trip has resulted in photographs that simultaneously document and question the self-constructed identities of the people and places that characterize America. From the freeways of Los Angeles to the downtown of St. Louis and the Wall Street district of New York, Opie now

turns her camera to the skyways and icehouses of the Twin Cities. The culmination of a year-long commission from the Walker Art Center, Skyways and Icehouses provides a meditative portrait of a locale, at once a straight-forward documentation and an inquiring social psycho-geography, an exploration of those symbolic architectures often taken for granted. Personal anecdotes, memories, and stories from Minnesota residents animate Opie's haunting landscapes.

Ancient tradition suggests that this world-weary lament is the work of Solomon in old age. Casting its eye over the transient nature of life, the book questions the striving for wisdom and the truth, choosing instead to espouse the value of living for the moment. The text is introduced by Doris Lessing.

An essential guidebook for walking the GR5, one of the world's most spectacular long-distance trails. The GR5 makes its way through the Alps from the shores of Lac Léman at Geneva to the Mediterranean at Nice. A route of 674km (420 miles), it can be trekked in a month, or split over a series of summer trips. The GR5 is well within the reach of fit and moderately experienced walkers and backpackers. There is good signposting and waymarking, and accommodation, food and drink are all

available at regular intervals. The paths and tracks are generally well graded, while steep climbs are tackled on zigzag paths, so the overall gradient is not so severe. Every summer, thousands of walkers embark on this trek. This guidebook also describes some scenic variant routes, including the stunning GR55 through the Vanoise National Park and the delightful GR52 that crosses the Mercantour National Park. Full descriptions and maps are provided for these alternatives. The book includes daily stages, timings, ascents and descents, full-colour mapping and gradient profiles, alongside information about facilities and services along the route. The result is an ideal companion to planning and completing your trek. Two further Cicerone guidebooks cover the remaining sections of the GR5; 'The GR5 Trail - Vosges and Jura', and 'The GR5 Trail - Benelux and Lorraine' which together cover the route from Lac Léman to the Hoek Van Holland.

From their haunts in the shadowy corner of a bar, front and center at a convenience store, or reigning over a massive mall installation bursting with light, sound, and action, arcade games have been thrilling and addicting quarter-bearers of all ages ever since Pong first lit up its paddles. Whether you wanted a few minutes' quick-twitch exhilaration or the taste of three-initial immortality that came with topping the high score screen, you could get it from the diverse range of space shooters, dot-eating extravaganzas, quirky beat-'em-ups, and more that have helped define pop culture for more than four decades. In *Attract Mode: The Rise and Fall of Coin-Op Arcade Games*, author Jamie Lendino celebrates both the biggest blockbusters (Pac-Man, Star Wars: The Arcade Game) and the forgotten gems (Phoenix, Star Castle) of the Golden Age of coin-op gaming, and pulls back the curtain on the personalities and the groundbreaking technologies that brought them to glitzy, color-drenched life in the U.S., Japan, and all over the world. You'll start your journey exploring the electromechanical attractions and pinball games of the early 20th century. Next, you'll meet the earliest innovators, who used college computers and untested electronics to

outline the possibilities of the emerging form, and discover the surprising history behind the towering megahits from Nintendo, Sega, and others that still inform gaming today. Then you'll witness the devastating crash that almost ended it all—and the rebirth no one expected. Whether you prefer the white-knuckle gameplay of *Robotron: 2084*, the barrel-jumping whimsy of *Donkey Kong*, or the stunning graphics and animation of *Dragon's Lair*, *Attract Mode* will transport you back to the heyday of arcade games and let you relive—or experience for the first time—the unique magic that transformed entertainment forever.

The production and distribution of film and audiovisual works is one of the most dynamic growth sectors in the world. Thanks to digital technologies, production has been growing rapidly in Africa in recent years. For the first time, a complete mapping of the film and audiovisual industry in 54 States of the African continent is available, including quantitative and qualitative data and an analysis of their strengths and weaknesses at the continental and regional levels. The report proposes strategic recommendations for the development of the film and audiovisual sectors in Africa and invites policymakers, professional organizations, firms, filmmakers and artists to implement them in a concerted manner.
