The controversial New York City police commissioner and New

York Times bestselling author of *The Lost Son* shares the story of his fall from grace and the effects of his incarceration on his views of the American justice system. Bernard Kerik was New York City 's police commissioner during the 9/11 attacks, and became an American hero as he led the NYPD through rescue and recovery efforts of the World Trade Center. His r e sum e as a public servant is long and storied, and includes receiving a Medal of Honor. In 2004, Kerik was nominated by George W. Bush to head the Department of Homeland Security. Now, he is a former Federal Prison Inmate known as #84888-054. Convicted of tax fraud and false statements in 2007, Kerik was sentenced to four years in federal prison. Now, for the first time, he talks candidly about what it was like on the inside: the torture of solitary confinement, the abuse of power, the mental and physical torment of being locked up in a cage, the powerlessness. With newfound perspective, Kerik makes a plea for change and illuminates why our punishment system doesn ' t always fit the

crime. In this extraordinary memoir, Kerik reveals his unprecedented view of the American penal system from both sides: as the jailer and the jailed. With astonishing candor, bravery, and insider 's intelligence, Bernard Kerik shares his fall from grace to incarceration, and turns it into a genuine and uniquely insightful argument for criminal justice reform.

In a broad sense, technology is any modification of the natural world made to fulfill human needs or desires. Although people tend to focus on the most recent technological inventions, technology includes a myriad of devices and systems that profoundly affect everyone in modern society. Technology is pervasive; an informed citizenship needs to know what technology is, how it works, how it is created, how it shapes our society, and how society influences technological development. This understanding depends in large part on an individual level of technological literacy. Tech Tally: Approaches to Assessing Technological Literacy determines the most viable approaches to assessing technological literacy for students, teachers, and out-of-school adults. The book examines opportunities and obstacles to developing scientifically valid and broadly applicable assessment

instruments for technological literacy in the three target populations. The book offers findings and 12 related recommendations that address five critical areas: instrument development; research on learning; computer-based assessment methods, framework development, and public perceptions of technology. This book will be of special interest to individuals and groups promoting technological literacy in the United States, education and government policy makers in federal and state agencies, as well as the education research community.

Science Focus 2 Forward Movement
The coronavirus pandemic is the kind of unpredictable, global catastrophe of staggering proportions that comes along not just every few years but perhaps once in a hundred years. What started out as health crisis, has quickly developed into an economic crisis spurring

social unrest across the world. And yet, despite the widespread distress, the picture is more complex than it may seem. For some companies, the crisis has and continues to, provide opportunities for new growth. This urgent and timely book by a visionary business practitioner, Nitin Rakesh, CEO, Mphasis and an award-winning academician, Jerry Wind, Lauder Professor Emeritus, Wharton bridges the worlds of industry and academia to bring you the knowledge that can help your business thrive in the new world. The book defines 8 key principles that form a highly adaptive framework, that gives businesses the tools to adapt and succeed in a

new reality. When Nitin Rakesh and Jerry Wind started collaborating on the book prior to the 2020 pandemic, these 8 principles were concepts on the best ways to navigate disruption that needed further exploration. However, today, having incubated the ideas for a period and encountering the unprecedented crisis, this book is a game changer for the business community. Any business, large or small, can customize and implement a winning strategy by using the eight principles and tools clearly outlined here to seek out opportunities for long-term value creation in a post-pandemic world.

This vintage book contains Alexander D'Agapeyeff's famous 1939 work, "Codes and Ciphers - A History of Cryptography". Cryptography is the employment of codes and ciphers to protect secrets, and it has a long and interesting history. This fantastic volume offers a detailed history of cryptography from ancient times to modernity, written by the Russian-born English cryptographer, Alexander D'Agapeyeff. Contents include: "The beginnings of Cryptography?", "From the Middle Ages Onwards?", "Signals, Signs, and Secret Languages?", "Commercial Codes?", "Military Codes and Ciphers?", "Types of Codes and Ciphers?", "Methods of Deciphering?", etcetera. Many antiquarian texts such as this, especially those dating back to the 1900s and before, are

increasingly hard to come by and expensive, and it is with this in mind that we are republishing this book now in an affordable, modern, high quality edition. It comes complete with a specially commissioned new biography of the author.

A comparative introduction to major global wireless standards, technologies and their applications From GSM to LTE-Advanced Pro and 5G: An Introduction to Mobile Networks and Mobile Broadband, 3rd Edition provides technical descriptions of the various wireless technologies currently in use. It explains the rationales behind their differing mechanisms and implementations while exploring the advantages and limitations of each technology. This edition has been fully updated and substantially expanded to

reflect the significant evolution in mobile network technology occurring over the past several years. The chapter on LTE has been extensively enhanced with new coverage of current implementations of LTE carrier aggregation, mobility management, cell reselection and handover procedures, as well as the latest developments in 5G radio and core networks in 3GPP. It now features additional information on the TD-LTE air interface, IPv6 in mobile networks, Network Function Virtualization (NFV) and Narrowband Internet of Things (NB-IOT). Voice-over-LTE (VoLTE) is now treated extensively in a separate chapter featuring coverage of the VoLTE call establishment process, dedicated bearer setup, header compression, speech codec and bandwidth negotiation,

supplementary service configuration and VoLTE emergency calls. In addition, extensive coverage of Voice-over-Wifi and mission critical communication for public safety organizations over LTE has been added. The WLAN chapter now provides coverage of WPA2-Professional with certificates for authentication in large deployments, such as the global Eduroam network and the new WLAN 60 GHz air interface. Bluetooth evolution has been addressed by including a detailed description of Bluetooth Low Energy (BLE) in the chapter devoted to Bluetooth. Describes the different systems based on the standards, their practical implementation and design assumptions, and the performance and capacity of each system in practice is

analyzed and explained Questions at the end of each chapter and answers on the accompanying website make this book ideal for self-study or as course material.
