IDEO, the widely
admired, award-winning
design and development
firm that brought the
world the Apple mouse,
Polaroid's I-Zone

Palm V, and hundreds of
other cutting-edge
products and services,
reveals its secrets
for fostering a
culture and process of
continuous innovation.
There isn't a business
in America that
doesn't want to be
more creative in its
thinking, products,
and processes. At many
companies, being first
with a concept and
first to market are
critical just to

survive. In *The Art of Innovation*, Tom Kelley, general manager of the Silicon Valley based design firm IDEO, takes readers behind the scenes of this wildly imaginative and energized company to reveal the strategies and secrets it uses to turn out hit after hit. IDEO doesn't buy into the myth of the lone genius working away in isolation, waiting for great ideas to strike. Kelley believes everyone can be creative, and the goal at his firm is to tap into that wellspring of creativity in order to make innovation a way of life. How does it do that? IDEO fosters an atmosphere conducive to freely expressing ideas, breaking the rules, and freeing people to design their own work environments. IDEO's focus on teamwork generates countless breakthroughs, fueled by the constant give-and-take among people ready to share ideas and reap the benefits of the group process. IDEO has created an intense, quick-turnaround, brainstorm-and-build process dubbed "the Deep Dive." In entertaining anecdotes, Kelley illustrates some of his firm's own successes (and joyful failures), as well as pioneering efforts at other leading companies. The book reveals how teams research and immerse themselves in every possible aspect of a new product or service, examining it from the perspective of clients, consumers, and other critical

audiences. Kelley takes the reader through the IDEO problem-solving method: • Carefully observing the behavior or "anthropology" of the people who will be using a product or service • Brainstorming with high-energy sessions focused on tangible results • Quickly prototyping ideas and designs at every step of the way • Cross-pollinating to find solutions from other fields • Taking risks, and failing your way to success • Building a "Greenhouse" for innovation IDEO has won more awards in the last ten years than any other firm of its kind, and a full half-hour Nightline presentation of its creative process received one of the show's highest ratings. The Art of

Innovation will provide the business leaders with the insights and tools they need to make their companies the leading-edge, top-rated stars of their industries.

Over the past 40 years, Lois Greenfield has earned a reputation as one of the world's most accomplished and respected photographers of human motion. Her images of dancers in mid-flight or mid-movement are astonishingly beautiful and capture the

magic of dance in a unique way. In the 17 years since her last book was published, Greenfield has moved into digital colour photography, and some 150 of these breathtaking images are reproduced in *Moving Still*. They reflect her collaboration with leading contemporary dancers, many of whom perform with international touring companies. The book reunites Greenfield with the distinguished writer and curator William A. Ewing, her enduring champion across the decades and author of her two previous monographs, who provides an illuminating introduction as well as an interview with the photographer about her recent work. The extended captions by Greenfield provide

fascinating insights into the creative process. Divided into four picture sections, the free-flowing, rhythmic design of the book does justice to the majestic beauty of Greenfield's photographs. [Thanksgiving Coloring and Activity Book Ages 3-7](#)
