I suddenly have no sound in

---

my TV's (Samsung PN42B450B1DXZA, 2009) internal speakers when attempting to view TV. I have a surround sound system connected with external speakers and it works fine. I have also run the audio test on the TV itself and the test performs fine.

I have same problem. My TV has a sound but no picture. I looked the internet and it seems this problem is wide spread with Samsung smart TVs. my Tv is 2 years in November just passed.

Can some one let me know what I can do? Many thanks.  
10 Ways To Fix A TV That Has A Picture But No Sound

...

The cables connected to your Samsung TV might be the problem. A loose cable may diminish picture and sound quality and create the humming. Connecting a cable to the wrong port on the back of your TV also may result in audio and video problems. Check if the cables are connected securely into the appropriate jacks to avoid audio noise and distortion.
