This volume details the technical features and operational performance of the Soviet Su-25 'Frogfoot', which proved itself as a durable and versatile attack aircraft in a variety of theatres such as Afghanistan, Georgia and Ossetia. Today it is widely accepted as the true successor to the types of specialised ground-attack aircraft that emerged during World War II. This book illuminates the service history of the 'Frogfoot' in over 30 years of combat using first-hand accounts and revealing archive photographs. The awkward-looking Su-25 has often been underrated, but the faithful 'Frogfoot' is now slated to remain in service with most of its current operators across the globe until at least 2020. This study explores the successes of the 'Frogfoot' in full, demonstrating its strengths as a formidably armed, armoured and very agile attack aircraft.

There are a couple of things to note about the build of this phone. First of all, the back of the phone is not glass but plastic, and I think that's one of the things that Samsung has chosen to do to get the price down, which is a great move as they're less prone to breaking when dropped and they make the phone a lot lighter than if they had a glass. Although the cloud white doesn't even look like plastic since they have a matte coating on it to fight the good fight against those fingerprints, it looks very clean, no matter what light you have on it. Samsung made sure that the FE is both IP 68 rated for water and dust resistance, which is great. The camera module on the back doesn't stick out nearly as much as other recent Samsung phones either; we'll talk about the triple camera system in a bit but for now, let's flip the phone over and talk about the display. The S20 FE has a huge 6.5-inch super M OLED 1080p display that runs any high refresh rate of 120 hertz. The display on the FE is also flat, the bezels on the phone are also completely asymmetrical, the sides are the thinnest, the top is a little bit thicker, and then the bottom is the thickest. It has excellent colors and contrasts from the amulet nature, and the high refresh rate makes using the phone a very fluid experience. The speakers on the FS are great in terms of clarity with the mids and highs. For the camera, there's a 12-megapixel wide, an-megapixel telephoto, and a

12-megapixel ultra-wide. This does seem a little cut down from the huge 108 megapixels wide from the note 20 Ultra and even the 64-megapixel telephoto camera on the S 20, but in real-world usage, the photos and videos coming from the rear cameras are pretty decent. The S 20 FE comes with a pretty big 4500 MHA hour battery for battery life no matter which version you get. You can get a screen time of around five hours before needing to recharge. The phone can wirelessly fast-charge at up to 15 watts fast charge via USB C and up to 25 watts in reverse wireless charge. a novel, but having trouble getting your first draft written? You've heard of "outlining," but that sounds too rigid for you. You've heard of "organic writing," but that seems a bit squishy to you. Take a look at the wildly popular Snowflake Method—ten battle-tested steps that jump-start your creativity and help you quickly map out your story. All around the world, novelists are using the Snowflake Method right now to ignite their imaginations and get their first drafts down. In this book, you'll follow the story of a fictitious novelist as she learns to tap into the amazing power of the Snowflake Method. Almost magically, she finds her story growing from a simple idea into a deep and powerful novel. And she finds her novel changing her—into a stronger, more courageous person. Zany, Over the Top, and Just Plain Fun How to Write a Novel Using the Snowflake Method is a "business parable"—a how-to guide written in story form. It's zany. It's over the top. It's just plain fun. It shows you how it's done, rather than tells you. You'll learn by example how to grow your story idea into a sizzling first draft. You'll discover: How to define your "target audience" the right way, so you know exactly how your ideal readers think and feel. Forget what the experts tell you about "demographics." How to create a dynamite selling tool that will instantly tell people whether they'll love your story or hate it. And you want them to love it or hate it. How to get inside the skin of each of your characters—even your villain. Especially your villain. How to find a deep, emotively powerful theme for your story. Do you know the best point in your novel to unveil your theme? How to know when to backtrack, and why backtracking is essential to writing great fiction. How to fire-test each scene to ensure it's high-impact—before you write it. ExcerptGoldilocks had always wanted to write a novel. She learned to read before she went to kindergarten. In grade school, she always had her nose in a book. In junior high, the other kids thought she was weird, because she actually liked reading those dusty old novels in literature class. All through high school, Goldilocks dreamed of writing a book of her own someday. But when she went to college, her parents persuaded her to study something practical. Goldilocks hated practical, and secretly she kept reading novels. But she was a very obedient girl, so she did what her parents told her. She got a very practical degree in marketing. After college, she got a job that bored her to tears—but at least it was practical. Then she got married, and within a few years, she had two children, a girl and then a boy. She quit her job to devote full time to them. As the children grew, Goldilocks took great joy in introducing them to the stories she had loved as a child. When her son went off to kindergarten, Goldilocks thought about looking for a job. But her resume now had a seven-year hole in it, and her practical skills were long out of date. The only jobs Goldilocks could qualify for were minimum wage. She suddenly realized that being practical had made her horribly unhappy. On a whim, Goldilocks decided to do the one thing she had always wanted more than anything else—she was finally going to write a novel. She didn't care if it was impractical. She didn't care if nobody would ever read her novel. She was going to do it just because she wanted to. For the first time in years, she was going to do something just for herself. And nobody was going to stop her.
