Dissatisfied with the explanations of previous researchers, Richard Andrews and Paul Schellenberger applied mathematical logic to the enduring mystery of Rennes-le-Château and the "treasure" alleged to be buried there. Beginning with a healthy skepticism, they assumed the enigma would wither under scrutiny. The quest began with an investigation into the activities of a group of 19th-century priests, but as the trail was pursued, it became apparent that the mystery's scope stretched far beyond the mountains of southern France. A series of paintings, maps, and tombstones pointed to one very specific location. The authors combined their knowledge of archaeology, theology, and surveying to produce a startling account of what they believe to be the true events surrounding the burial of Jesus.

From one of the most prestigious nonprofit organizations devoted to environmental issues comes a clear, practical, and rational overview of the relationship between consumers and the environment. Paper or plastic? Bus or car? Old house or new? Cloth diapers or disposables? Some choices have a huge impact on the environment; others are of negligible importance. To those of us who care about our quality of life and what is happening to the earth, this is a vastly important issue. In these pages, the Union of Concerned Scientists help inform consumers about everyday decisions that significantly affect the environment. For example, a few major decisions--such as the choice of a house or vehicle--have such a disproportionately large affect on the environment that minor environmental infractions shrink by comparison. This book identifies the 4 Most Significant Consumer-Related Environmental Problems, the 7 Most Damaging Spending Categories, 11 Priority Actions, and 7 Rules for Responsible

Consumption. Learn what you can do to have a truly significant impact on our world from the people who are at the forefront of scientific research.

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain

that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

A House by the Park tells the saga of a Syrian immigrant family forged by the Great Depression, buffeted by World War II, and steeled by illness, assimilation and the turmoil of six siblings battling in the post-war era to shed the value systems of their Middle Eastern parents. In addition to painting a vivid portrait of urban neighborhood life in Brooklyn, New York during the forties and fifties, Dr. Keyloun describes in wrenching detail the complexities of personality and behavior that marked the conflicting relationships within his family. Although much of the discord could easily be attributed to sibling rivalry or the rebellion against cultural anomalies, Dr. Keyloun exposes how his familial relationships were further impacted by what would eventually become known as bipolar disorder. Spanning from his early formative years through the present day, A House by the Park is a memoir told with brutal honesty, but also with undeniable love and affection.

In the small town of McCleary, a family comes together to celebrate

Christmas. Before the fun can commence, however, something frightening happens. The ground starts to tremble...a flash of blinding light sparks outside the window. Upon exiting the house to see what the quake may have destroyed, the family not only meets a new world, but Angela McLean meets a legendary creature that's about to alter their lives forever. Entering Drakous Realm, they find themselves in precarious situations. Angela's brother, Izak, meets a woman with the power only a lifetime of magic can provide. Their sister, Neveah, is being stalked by a sorceress seeking revenge, while their mother, Julia, meets a man who may be a mate like no other in existence. As a normal family turns into humans walking in a mystical realm, the twists and turns become more remarkable and mysterious with each step. In this story of unity, battles fought with hellish beings, and life both below the waters and on land, the family finds they are connected to both the good and the bad entities within this new world. In *Family Crystals*, author Amber Vonda gives readers a slew of opportunities to discover lives they would have never thought possible.

Around the world, parties of the left and center-left have been struggling, losing ground to right-wing parties and various forms of reactionary populism. This book brings together a range of leading academics and experts on social democratic politics and policy to offer an international,

comparative view of the changing political landscape. Using case studies from the United Kingdom, Germany, Spain, France, Australia and New Zealand contributors argue that despite different local and specific contexts, the mainstream center-left is beset by a range of common challenges. Analysis focuses on institutional and structural factors, the role of key individuals, and the atrophy of progressive ideas as interconnected reasons for the current struggles of the center-left.
