Handbook of Research on Enterprise 2.0: Technological, Social, and Organizational Dimensions Springer Nature In the future, shopping will be greatly influenced by a combination of localization issues, mobile internet at the point of sale, and use of social networks. This book focuses on the ‘ SoLoMo synergies ’ that arise from this paradigm shift in future shopping, which also promises new and effective marketing options for traditional retailers. It also reflects the current status of research and business practice, analyzing the basic factors of SoLoMo in detail. The importance of Location-based Services (LBS) is elaborated and analyzed in an empirical study using a market based case of kaufDA – a leading German online shopping network. The evidence shows that customers see LBS as an attractive tool and are prepared to change their buying behavior. Though LBS is still in its early stages and its professional longevity remains to be seen, it also promises tremendous potential for the

future.

This book provides an overview of the latest research and development of new technologies for cognitive radio, mobile communications, and wireless networks. The contributors discuss the research and requirement analysis and initial standardization work towards 5G cellular systems and the capacity problems it presents. They show how cognitive radio, with the capability to flexibly adapt its parameters, has been proposed as the enabling technology for unlicensed secondary users to dynamically access the licensed spectrum owned by legacy primary users on a negotiated or an opportunistic basis. They go on to show how cognitive radio is now perceived in a much broader paradigm that will contribute to solve the resource allocation problem that 5G requirements raise. The chapters represent hand-selected expanded papers from EAI sponsored and hosted conferences such as the 12th EAI International Conference on Mobile and Ubiquitous Systems, the 11th EAI International Conference on Heterogeneous Networking for Quality, Reliability, Security and Robustness, the 10th International Conference on Cognitive Radio Oriented Wireless Networks, the 8th International Conference on Mobile Multimedia Communications, and the EAI International Conference on Software Defined Wireless Networks and Cognitive Technologies for IoT.

Since the start of the recent financial crisis, as most global firms struggle to remain competitive, an increasing number of Korean and Japanese firms have experienced an amazing rate of growth and expansion. Although academic researchers and business leaders in the United States, China, Brazil, India, and Europe seek out the secrets to these businesses ' success, little is known about their business practices. Supplying an insider ' s perspective, Building Network Capabilities in Turbulent Competitive Environments: Practices of Global Firms from Korea and Japan unveils the strategic and

operational practices that have allowed these firms to catch and surpass their competitors in North America and Europe. Based on fieldwork studies and extensive interviews with senior executives, it explains how these companies have developed and enhanced their core competencies through effective integration of product architecture, supply chain management, and IT strategy. The book provides practical insight into changing business patterns while avoiding extensive mathematical algorithms and drawn-out theoretical descriptions. It uses cutting-edge case studies to illustrate the innovative manufacturing strategies of these rapidly emerging companies. Accessible to anyone with a basic understanding of business, it reveals the organizational processes of strategy formulation and implementation that are required for success. Providing a clear understanding of both the career implications of the changing business landscape and how to deliver products and services that meet and exceed the needs of your customers, this book will help you develop the socio-technical skills needed to succeed in an increasingly competitive and turbulent business environment.
