Radar Instruction Manual  
Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance

radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.  
Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.  
It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.  
This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.

This second, updated edition of the best-selling Radio-Frequency Electronics introduces the basic concepts and key circuits of radio-frequency systems. It covers the fundamental principles applying to all radio devices, from wireless single-chip data transceivers to high-power broadcast transmitters. This new edition is extensively revised and expanded throughout, including additional chapters on radar, digital modulation, GPS navigation, and S-parameter circuit analysis. New worked examples and end-of-chapter problems are included to aid and test understanding of the topics covered, as well as numerous extra figures to provide a visual aid to learning. Key topics covered include filters, amplifiers, oscillators, modulators, low-noise amplifiers, phase lock loops, transformers, waveguides, and antennas. Assuming no prior knowledge of radio electronics, this is a perfect introduction to the

subject. It is an ideal textbook for junior or senior courses in electrical engineering, as well as an invaluable reference for professional engineers in this area.

Is your Dream going to college & getting a degree? How many college grads find work in their chosen fields today? How many are doing that same work 10 years later... or even 5 years later? Likely one out of hundred. Is your Dream getting a good JOB? Working for living? Can you get a job where you can earn what you are worth... where you will become financially independent... and find fulfillment... and gain freedom... trading your time for money? BURKE HEDGES -- Have you ever been made fun of...ridiculed...and abused...until finally there came a time when you said, "ENOUGH IS

ENOUGH!" Well, I came to that point in my life. I'm mad as hell--and I'm not going to take it anymore! So I wrote this book to tell you the truth...to tell you what your real chances are today to make it in conventional businesses that are closing their doors every day--and laying off people by the thousands! I finally decided that someone needs to tell the truth about how the average person could succeed in an industry that is revolutionizing the way the world does business...how you could be your own boss and earn anywhere from part-time income to an absolute fortune in an unconventional business called Network Marketing. Is Network Marketing a scam?...A scheme?...Or the American Dream? You deserve to know the truth. The whole truth. And nothing but the truth! Read this book...and you be the judge!

Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is the reference other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities.
