Contrary to conventional wisdom, the concept of power has not always been central to international relations theory. During the 1920s and 30s, power was often ignored or vilified by international relations scholars—especially in America. *Power and International Relations* explores how this changed in later decades by tracing how power emerged as an important social science concept in American scholarship after World War I.

Combining intellectual history and conceptual analysis, David Baldwin examines power's

increased presence in the study of international relations and looks at how the three dominant approaches of realism, neoliberalism, and constructivism treat power. The clarity and precision of thinking about power increased greatly during the last half of the twentieth century, due to efforts by political scientists, psychologists, sociologists, economists, philosophers, mathematicians, and geographers who contributed to "social power literature." Baldwin brings the insights of this literature to bear on the three principal theoretical traditions in international relations theory. He discusses controversial issues in power analysis, and shows the relevance

of older works frequently underappreciated today. Focusing on the social power perspective in international relations, this book sheds light on how power has been considered during the last half century and how it should be approached in future research.

The finds from the cave at Hagios Charalambos in the Lasithi Plain illustrates secondary burial practices in Early and Middle Bronze Age Crete. The cavern adds to our knowledge of Early and Middle Minoan Lasithi and illuminates the function of the cave at Trapeza, which has close parallels for most classes of objects found at Hagios Charalambos. Most of the pottery from the site is made locally, but a selection of imports from elsewhere in Crete ranges in date from EM I or earlier to MM IIB. The pottery shows a shift in the use of imports during the site 's history, reflecting a change in economic and/or political dominance and influence in Lasithi. Typical of pottery associated with burials,

the types of vessels were mostly used for pouring and drinking liquids. Other small vessels probably contained precious oils, liquids, and unguents. The local offering tables would have been carried by a short stem and could hold a liquid or solid offering. The pottery shows that the people who deposited their dead in the secondary burial cave at Hagios Charalambos were in contact with ceramic production centers in East Crete, the Mesara, Knossos, the Pediada, and Malia. This range of influences speaks not only of trade relations and political spheres of influence but also of tastes in pottery production and consumption. The Brethren Liverpool University Press

For instance, substantial revision to the internship, licensure, and certification processes has occurred, and are reflected in this resource. Much of the literature on clinical psychology, cultural sensitivity, and the current job market is updated. Changes in technology have large effects on teaching and practicing clinical psychology. These modifications are needed to offer appropriate and updated information for students. In short, virtually every chapter has substantial modification to ensure that the material is accurate and up to date.

A number of countries have recently discovered and are developing oil and gas reserves. Policy makers in such countries are anxious to obtain the greatest benefits for their economies from the extraction of these exhaustible resources by designing appropriate policies to achieve desired goals. One important theme of such policies is the so-called local content created by the sector—the extent to which the output of the extractive industry sector generates further benefits to the economy beyond the direct contribution of its value-added, through its links to other sectors. While local content policies have the potential to stimulate broad-based economic development, their application in petroleum-rich countries has achieved mixed results. This paper describes the policies and practices meant to foster the

development of economic linkages from the petroleum sector, as adopted by a number of petroleum-producing countries both in and outside the Organisation for Economic Co-operation and Development. Examples of policy objectives, implementation tools, and reporting metrics are provided to derive lessons of wider applicability. The paper presents various conclusions for policy makers about the design of local content policies. An International Focus World Bank Publications

State Violence and the Execution of Law stages a provocative analysis of how the biopolitical divide between human and animal has played a fundamental role in enabling state violence, including torture, secret imprisonment and killing-at-a-distance via drones. Analyzing the complex ways in which the United States government deploys law

in order to consolidate and further imperial relations of power, Pugliese tracks the networks that enable the diffusion and normalization of the state ' s monopoly of violence both in the US and in an international context. He demonstrates how networks of state violence are embedded within key legal institutions, military apparatuses, civilian sites, corporations, carceral architectures, and advanced technologies. The author argues that the exercise of state violence, as unleashed by the war on terror, has enmeshed the subjects of the Global South within institutional and discursive structures that position them as non-human animals that can be tortured, killed and disappeared with impunity. Drawing on poststructuralist, critical race and whiteness, and critical legal theories, the book is transdisciplinary in its approach and value. It will be

invaluable to university students and scholars in Critical Legal and Socio-Legal Studies, Cultural Studies, Race and Ethnicity Studies, International Politics, and Postcolonial Studies.

Popular opinion suggests that information has become a distinguishing feature of the modern world. Where once economies were built on industry and conquest, we are now instead said to be part of a global information economy. In this new and thoroughly revised edition of his popular book, author Webster brings his work up-to-date both with new theoretical work and with social and technological changes - such as the rapid growth of the internet and accelerated globalization - and reassesses the work of key theorists in light of these changes. This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post-war era.

Midwifery Independently Published
The dramatic account of a Revolutionary-era conspiracy in which a band of farmers opposed to military conscription and fearful of religious persecution plotted to kill the governor of North Carolina. Less than a year

into the American Revolution, a group of North Carolina farmers hatched a plot to assassinate the colony's leading patriots, including the governor. The scheme became known as the Gourd Patch or Llewellen Conspiracy. The men called themselves the Brethren. The Brethren opposed patriot leaders' demand for militia volunteers and worried that "enlightened" deist principles would be enshrined in the state constitution, displacing their Protestant faith. The patriots' attempts to ally with Catholic France only exacerbated the Brethren's fears of looming heresy. Brendan McConville follows the Brethren as they draw up plans for violent action. After patriot militiamen threatened to arrest the Brethren as British sympathizers in the summer of 1777, the group tried to spread false rumors of a slave insurrection in hopes of winning loyalist support. But a disaffected insider denounced the movement to the authorities, and many members were put on trial. Drawing on contemporary

depositions and legal petitions, McConville gives voice to the conspirators' motivations, which make clear that the Brethren did not back the Crown but saw the patriots as a grave threat to their religion. Part of a broader Southern movement of conscription resistance, the conspiracy compels us to appreciate the full complexity of public opinion surrounding the Revolution. Many colonists were neither loyalists nor patriots and came to see the Revolutionary government as coercive. The Brethren tells the dramatic story of ordinary people who came to fear that their Revolutionary leaders were trying to undermine religious freedom and individual liberty—the very causes now ascribed to the Founding generation. Democracy Incorporated Cengage Learning The historic European Union Directive on Data Protection will take effect in October 1998. A key provision will prohibit transfer of personal information from Europe to other countries if they lack "adequate"

protection of privacy. If enforced as written, the Directive could create enormous obstacles to commerce between Europe and other countries, such as the United States, that do not have comprehensive privacy statutes. In this book, Peter Swire and Robert Litan provide the first detailed analysis of the sector-by-sector effects of the Directive. They examine such topics as the text of the Directive, the tension between privacy laws and modern information technologies, issues affecting a wide range of businesses and other organizations, effects on the financial services sector, and effects on other prominent sectors with large transborder data flows. In light of the many and significant effects of the Directive as written, the book concludes with detailed policy recommendations on how to avoid a coming trade war with Europe. The book will be of interest to the wide range of individuals and organizations affected by the important new European privacy laws. More generally, the privacy clash

discussed in the book will prove a major precedent for how electronic commerce and world data flows will be governed in the Internet Age.
