Harris Tweed is a unique woollen textile that has been hand-woven by islanders off the west coast of Scotland for generations. Worn worldwide, it is cherished both for the clothing made from it and as a fascinating traditional craft. Lara Platman spent a year with the farmers, mill workers, weavers, tailors and designers who are carrying this tradition forward into the twenty-first century and in *Harris Tweed: From Land to Street* she follows the chain of craftsmen, from the islanders in the Hebrides to the tailors of Savile Row. With an eye for character, colour and light, and an ear for a good story, Lara has created extraordinary portraits of these living national treasures, complemented by evocative images of the landscapes of Harris, the tweed patterns whose textures and colours seem to emerge from the land, and the use of Harris tweed in the work of fashion designers including Vivienne Westwood, Margaret Howell and Paul Smith. Offering insights into a lifestyle whose continued existence may surprise many, this group portrait is a heartfelt celebration of craftsmanship and a way of life.

8 1/2 x 10 Since publication this title has proved to be very popular for both the serious lens user wishing to understand more about his lenses, as well as the Leica enthusiast considering which lens would be suitable to add to his outfit. Do you know your "Coma from your Aberrations"? If "Yes," then part 2 of Erwin Puts' new book will be of considerable interest to you. Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.

In the tradition of California the Beautiful, Galen Rowell's best-selling celebration of the natural beauty of the Golden State, comes Yosemite & the Eastern Sierra, featuring stunning color images by outdoor photographer Gary Crabbe. Here is a fresh look at the wonders of Yosemite National Park (visited by more than three million people each year), as well as the lesser-known vistas of the pristine wilderness that adjoins the eastern slopes of the Sierra Nevada. From the first light of sunrise cascading above an alpine creek to the last glint of sunset reflected on the joyful serenade of a waterfall ballet at Horsetail Falls, the spirit of the land will nourish your soul. The accompanying text of this small but exquisitely printed volume speaks through the voices of our great nature writers, from Ansel Adams and Galen Rowell to Joan Didion, Wallace Stegner, and Mark Twain. This is the perfect gift for anyone who has ever marveled at the beauty of Yosemite National Park and the glorious gallery of the Eastern Sierra's natural wonders.

First published in 1996, Mary Street Alinder's biography of Ansel Adams remains the only full biography of one of the greatest American photographers. Alinder is a respected scholar, and also had a close connection to Adams, serving as his chief assistant in the last five years of his life. The portrait she creates of him is intimate and affectionate; it is also clear-eyed. She takes on his difficult childhood in San Francisco, the friendships and rivalries within his circle of photographers, his leadership in America's environmental movement, his marriage, his affairs, and his not-always-successful fatherhood. Enriched by her uniquely personal understanding of Adams the man, she explains the artistic philosophy that, paired with his peerless technique, produced an inimitable style. Her biography is likely to remain unrivaled. This new edition will bring the classic up to date and includes research that reveals new information and a deeper understanding of his greatest photographs. It will also include thirty-two pages of reproductions of Adams's work and snapshots of the artist and close friends.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental

biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
