A Life Less Ordinary Mohr Siebeck

"Fairies Afield" is a children's fantasy story written by Mary Louisa Molesworth, a well-known English children's author in the late nineteenth and early twentieth century. The book, published in 1902, is part of Molesworth's wide body of work, which includes a number of novels and stories for children. The story follows two siblings, Tottie and Tittie, as they go on a fantastic journey into the world of fairies. The children discover a secret road in the woods that leads them to the world of the fairies, where they meet a variety of wonderful creatures and participate in quirky and enchanting adventures. The kids become friends with fairies, elves, and other mystical creatures as they explore this magical realm. Like children's books from the Victorian and Edwardian eras, the story is full with endearing moments and soft moral messages. The narratives of Molesworth highlight kindness, amazement, and inventiveness. "Fairies Afield" perfectly encapsulates the essence of beloved children's books with its themes of friendship, magic, and youthful innocence. For those who appreciate classic stories of magic and adventure, the novel is still enjoyable.

The color photographs and illustrations appearing in select monographs over the past decade represent a significant advance in surgical communication. Previously, black and white renderings were standard because color printing had not been perfected and its cost was prohibitive. We believe the gradual change from black and white etchings and reproductions to detailed color illustrations represents a tremendous twentieth century achievement. In our own urologic practices it became evident that the use of black and white sketches for teaching operative urology, while helpful, left too much to the surgeon's imagination. Even the dimension of depth, produced by varying the intensity of shading, often was inadequate in demonstrating subtle surgical details in a fossa or bed. Since color photography recently has been used to demonstrate operative techniques, we climbed on the bandwagon and photographed in color many of the major operative procedures. However, the reflection of light caused by normal tissue fluid significantly reduces the clarity of photographs. Not infrequently, the crucial operative step is obscured by light reflected on a trickle of blood. Even when meticulous care is taken to irrigate and clean the surgical field, the tissue sheen obscures portions of the field. Color paintings by a gifted artist are not only unique, but can be extraordinary; the vividness with which subtleties can thus be portrayed cannot be matched by photography, black and white or color.

Kertzer presents shocking revelations about the role played by the Vatican in the development of modern anti-Semitism. Working in long-sealed Vatican archives, Kertzer unearths startling evidence to undermine the Church's argument that it played no direct role in the spread of modern anti-Semitism. In doing so, he challenges the Vatican's recent official statement on the subject, We Remember. Kertzer tells an unsettling story that has stirred up controversy around the world and sheds a much-needed light on the past.

This reader makes the key essays of 19th century French philosopher Félix Ravaisson available in English for the first time. In recent years, Ravaisson has emerged as an extremely important and influential figure in the history of modern European philosophy. The volume contains the classic 1838 dissertation Of Habit, studies of Pascal, Stoicism and the wider history of philosophy together with the Philosophical Testament that he left unfinished when he died in 1900. The volume also features Ravaisson's work in archaeology, the history of religions and art-theory, and his essay on the Venus de Milo, which occupied him over a period of twenty years after he noticed, when hiding the statue behind a false wall in a dingy Parisian basement during the Franco-Prussian war, that it had previously been presented in a way that deformed its original bearing and meaning. Félix Ravaisson: Selected Essays contains an introductory intellectual biography of Ravaisson, which contextualises each of the essays in the volume. It also features an annotated bibliography of suggested further reading. This book will grant scholars and students alike wider access to his distinctive contribution to the history of philosophy.

Odd Magne Bakke presents the first in-depth study of 1 Clement from the standpoint of the letter's rhetoric. He bases his methodological analysis on tools from the Graeco-Roman rhetorical tradition, using both the handbooks as well as actual speeches and letters. These are supplemented by tools from modern text linguistics, which the author uses to do a compositional analysis of the letter, and by the tools of modern semantics, used to establish the language

of concord in 1 Clement which it has in common with other relevant ancient literature. The author's approach constitutes a fresh reading of 1 Clement and provides new suggestions on several important issues in the immense research on the letter. He demonstrates both the thematic and argumentative unity of the letter. Its macro-structure reflects the conventional parts of the dispositio of ancient rhetoric ( exordium, narratio, probatio, peroratio ). Also, the sub-texts on different levels of these parts are shown to be integrated into and to serve Clement's overall argument for re-establishing concord and peace in the Corinthian church. Odd Magne Bakke questions the traditional views that the conflict in this church was between 'spirit' and 'office' or was a matter of 'doctrine'. He argues that Clement primarily regarded it as a conflict between people of different socio-economic statuses in which a struggle for honor appeared to be an important aspect.
