technology (ICT)  
and the automotive  
sector are two of  
the most important  
industries in the  
EU and the US.  
The EU's eastern

---

expansion and economic globalization have reinforced competition on the one hand; on the other hand the importance of outsourcing and off-shoring has increased. Against this background the intensification of innovation dynamics becomes crucial – and with them the role of regional innovation clusters. The analysis examines seven regions and six EU countries. The focus is on cluster and network dynamics in both industries, as regional ICT

clusters are playing an increasingly central role in many European regions. Specialization and structural change in the automotive sector are highlighted, and new strategic approaches for multinational companies and changes in policy options are identified. Hi-fi News & Record Review Michael O'Mara Books Starting with a 10-day meal plan for those wishing to try out the macrobiotic diet, this title explains each meal in terms of its health benefits. With over 100 recipes, an appendix explaining the basic principles of

macrobiotics, and a glossary of ingredients, it offers an introduction to an ancient diet. Mayumi Nishimura, one of Japan's best-kept secrets, has worked as Madonna's macrobiotic chef since 2001. In 'Mayumi's Kitchen', her first book in English, she shares her repertoire of healthy, delicious recipes, starting with a 10-day meal plan for Science Focus Heinemann Mirzal provides software you need to implement your own search engine. Python, a popular mult

platform scripting language with simple syntax and comprehensive libraries, was chosen for the search engine, and step-by-step instructions for installation in Windows and Linux environments are given. Perfecting Sound Forever Harper Collins In the past ten years there was a worldwide trend towards increased use

of Tunnel Boring Machines (TBM's). This trend covers a broad variety of applications ranging both from small diameters for sewers and other utilities to large diameters for double track railway and even three-lane highway tunnels. The response to this has been the development of both hard rock machines in the direction for application in soft ground,

and soft ground TBM's to be used in soft rock. Parallel to the technical development of TBM's towards applications for longer tunnels, running through changing geological conditions, there are needs for the development of lining methods. 'TBM Tunnel Trends' an international lecture series collection, aims to present the latest scientific and practical state of the art of TBM tunnelling,

---

taking into consideration interactions between machinery and lining. 26 international highly recognized papers.

**From Tinfoil to Stereo B&H Publishing Group**

This book looks at the emerging power dynamics in the Indo-Pacific region and locates India and its interests within the overarching geostrategic framework. With US and China emerging as leading players

within the region, the book analyses the challenges to India's foreign policy in the face of new alliances, counter-alliances, and great power equations that have formed after the Cold War. It discusses important issues such as China's strategic forays in the Indian Ocean, the balance of power between countries, India's Act East opportunities, Russia's re-engagement in the region, the South China Sea

dispute, India's maritime strategy, and the conundrum of the Quadrilateral Security Dialogue facing India. A comprehensive study of the changing geopolitical and geostrategic environment of the Indo-Pacific region, the book will be an essential read for scholars and researchers of international relations, global politics, foreign policy, maritime studies, Chinese studies, South Asian studies, geopolitics, and

---

strategic studies. *Audio* Springer Science & Business Media The Common Core State Standards (CCSS) identify three essential writing genres: narrative, persuasive, and informative. This highly practical guide offers a systematic approach to instruction in each genre, including ready-to-use lesson plans for grades 3-5. Grounded in research on strategy instruction and self-regulated learning, the book shows how to teach students

explicit strategies for planning, drafting, evaluating, revising, editing, and publishing their writing. Sixty-four reproducible planning forms and student handouts are provided in a convenient large-size format; purchasers also get access to a Web page where they can download and print the reproducible materials. The Appendix contains a Study Guide to support professional learning.

**Developmental Biology of Neoplastic Growth** Cisco

Press Internationally beloved opera star Deborah Voigt recounts her harrowing and ultimately successful private battles to overcome the addictions and self-destructive tendencies that nearly destroyed her life. Call Me Debbie is one of the most electrifying performances of Deborah Voigt's life. The brilliantly gifted opera soprano takes us behind the velvet curtains to tell her compelling story—a tale of

---

success, addiction, music, and faith as dramatic as any role she has performed. For the first time, she talks about the events that led to her dangerous gastric bypass surgery in 2004 and its shocking aftermath: her substantial weight loss coupled with the “cross addiction” that led to severe alcoholism, frightening all-night blackouts, and suicide attempts. Ultimately, Voigt emerged from the darkness to achieve

complete sobriety, thanks to a twelve-step program and a recommitment to her Christian faith. Colored by hilarious anecdotes and juicy gossip that illuminate what really goes on backstage, Voigt paints diverting portraits of the artists with whom she’s worked, her most memorable moments onstage, and her secrets to great singing. She also offers fascinating insight into the roles she’s played and the characters she

loves, including Strauss’s Ariadne and Salome, Puccini’s Minnie, and Wagner’s Sieglinde, Isolde, and Brünnhilde, sharing her intense preparation for playing them. Filled with eight pages of color photos, *Call Me Debbie* is an inspirational story that offers a unique look into the life of a modern artist and a remarkable woman. **The Home Rule Bill** University of Chicago Press  
The previously

untold story of the Zenith Trans-Oceanic, the world's most romantic and expensive series of portable radios. Long a companion of kings, presidents, transoceanic yachtsmen and world explorers, the Trans-Oceanic was also carried into battle by American troops in three wars. Its great popularity in spite of a very high price can be laid at the feet of several generations of armchair travelers who used the shortwave capabilities of the Trans-Oceanic as a window on the

world. With access to the Zenith corporate archives and their long experience as radio enthusiasts and writers for both the popular and scholarly press, Professors Bryant and Cones present the engrossing stories of the development and use of the Trans-Oceanic throughout its forty year life. They present a wealth of never-before published photographs, documents and information concerning these fascinating radios, their collection, preservation and restoration.

*An EasyGuide to APA Style*  
London ; New York : Cassell  
'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle  
In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham

---

and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work.

Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the

animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up

investigates the individuals, the companies, and the legal machinations that led to virtually every major development in the talking machine industry, up to the installation of sound on Hollywood stages and in movie theaters across the country. This edition contains many new photographs, most taken between 1888 and 1912, that have never appeared in any publication.

**Clusters in Automotive and Information & Communication Technology**

Farrar, Straus and Giroux  
Few scholars have been as influential in finance, both as an academic field and an industry, as Eugene Fama.

Since writing his groundbreaking 1970 essay on efficient capital markets, Fama has written over 100 papers and books that have been cited hundreds of thousands of times. Yet there is no one collection where one can easily find his best work in all fields. "The Fama Portfolio" will be an outstanding and unprecedented resource in a field that still concentrates mainly on questions stemming from Fama's work: Is the finance industry too large or too small? Why do people continue to pay active managers so much? What accounts for the monstrous amount of trading? Do high-

speed traders help or hurt? The ideas, facts, and empirical methods in Fama's work continue to guide these investigations. "The Fama Portfolio" will be a historic and long-lasting collection of some of the finest work ever produced in finance."

are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information.

**High Fidelity News and Record Review** High Fidelity News and Record Review The Zenith Trans-Oceanic In 1915, Thomas Edison proclaimed that he could record a live performance and reproduce it perfectly, shocking

audiences who found themselves unable to tell whether what they were hearing was an Edison Diamond Disc or a flesh-and-blood musician. Today, the equation is reversed. Whereas Edison proposed that a real performance could be rebuilt with absolute perfection, Pro Tools and digital samplers now allow musicians and engineers to create the illusion of performances that never were. In between lies a century of sonic exploration into the balance between the real and the represented. Tracing the contours of this history, Greg Milner takes us through

the major breakthroughs and glorious failures in the art and science of recording. An American soldier monitoring Nazi radio transmissions stumbles onto the open yet revolutionary secret of magnetic tape. Japanese and Dutch researchers build a first-generation digital audio format and watch as their "compact disc" is marketed by the music industry as the second coming of Edison yet derided as heretical by analog loyalists. The music world becomes addicted to volume in the nineties and fights a self-defeating "loudness war" to get its fix. From Les Paul to Phil Spector

---

to King Tubby, from vinyl to pirated CDs to iPods, Milner's Perfecting Sound Forever pulls apart musical history to answer a crucial question: Should a recording document reality as faithfully as possible, or should it improve upon or somehow transcend the music it records? The answers he uncovers will change the very way we think about music.
