Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was

meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany,

France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.

Is profit-making the only goal of a business? Should an unbridled market mechanism drive corporate enterprise? To what extent should corporations compensate for the manifest and hidden costs that are incurred by the society at large? These are some of the questions that have engaged specialist economists, business barons, corporate heads and management experts for decades. A consensus has emerged that corporate practices cannot bypass

the fundamental demands of ethical behaviour, that administration and policies of governance have to be more transparent and publicly accountable, and that businesses must be sensitive to the community and environment within which they are established. This has led to the emergence of three key concepts of contemporary businesses, namely, business or corporate ethics, corporate governance, and corporate social responsibility.

This book focuses on transactions between English and Telugu through a study of translations and related works

published from about the early-nineteenth century to mid-twentieth century. Moving beyond Edward Said's theoretical paradigms which suggest that these interfaces were driven by imperial and colonial interests, the essays in this volume look at how they also triggered developments within the indigenous literary and cultural practices and evolved new forms of expression. The book will be of great interest to scholars and researchers of linguistics, translation studies, comparative literature, cultural studies and modern South Asian history.
