Recently vilified as

the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues

with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms. For most people, the Great Crash of 2008 has meant troubling times. Not so for those in the flourishing poverty industry. These mercenary entrepreneurs have taken advantage of an era of deregulation to devise high-priced products to sell to the credit-hungry working poor, including the instant tax refund and the payday loan. In the process they've created an industry larger than the casino

business and have proved that pawnbrokers and check cashers, if they dream big enough, can grow very rich off those with thin wallets. Broke, USA is Gary Rivlin's riveting report from the economic fringes. Timely, shocking, and powerful, it offers a much-needed look at why our country is in a financial mess and gives a voice to the millions of ordinary Americans left devastated in the wake of the economic collapse.
