A History of Thailand offers a lively and accessible account of Thailand's

political, economic, social and cultural history. This book explores how a world of mandarin nobles and unfree peasants was transformed and examines how the monarchy managed the foundation of a new nation-state at the turn of the twentieth century. The authors capture the clashes between various groups in their attempts to take control of the nation-state in the twentieth century. They track Thailand's economic changes through an economic boom, globalisation and the evolution of mass society.

This edition sheds light on Thailand's recent political, social and economic developments, covering the coup of 2006, the violent street politics of May 2010, and the landmark election of 2011 and its aftermath. It shows how in Thailand today, the monarchy, the military, business and new mass movements are players in a complex conflict over the nature and future of the country's democracy.

Millionaire by Thirty Scarecrow Press

Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This

generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew

has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time

they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.
