RV_ACCOUNTING_DOCUMENT_CREATE converts the billing document into the interface structures ACCHD, ACCIT, and ACCCR and the internal interface tables XACCIT, XACCCR, XACCHD are filled. These are then converted in Function AC_DOCUMENT_CREATE into the accounting document tables BSEG (accounting segment), BSET (taxes) and BKPF (document header). An ACCHD line is created for each and every billing ...

Interface Documentation in SAP Solution Manager 7

The classic way for communication between non-SAP systems and SAP is, according to SAP itself, the RFC interface. RFC interfaces are also often used to communicate between SAP systems itself. Put simply, RFC is a remote function call. The RFC interfaces for integration have been available since SAP/R3 until today.

Sap Interface Documentation

If the application (and thus the SAP MaxDB interface) is on a different computer than the database, the database system also needs the SAP MaxDB X Server (communication server) for communication. Note that the JDBC interface needs the X Server even if it is installed on the same computer as the database. More information: X Server documentation

SAP interfaces - ibm.com

The BAPI interfaces WebSphere Adapter for SAP Software supports outbound processing and inbound processing for simple BAPIs. In outbound processing, the client applications call BAPIs and other RFC-enabled functions on the SAP server. In inbound processing, the SAP server sends an RFC-enabled function (such as a BAPI function) through the adapter to an endpoint.
