SAP Library - SAP Solution Manager The SAP Solution Manager is a platform which provides integrated support of the life-cycle of a business solution, from the Business Blueprint via configuration to production operation. The SAP Solution Manager provides central access to tools, methods and preconfigured contents, which you can use during the evaluation and implementation, as well as in operation processing of your systems.

SAP Library - SAP Solution Manager SAP Cloud Appliance Library offers a quick and easy way to consume the latest SAP solutions in the cloud, such as SAP S/4HANA, SAP HANA Express Edition, Model Company Solutions, Industry Solutions etc. It's an online library of latest, preconfigured, ready-to-use SAP solutions that can be instantly deployed into your own public cloud accounts (e.g. Amazon Web Services, Microsoft Azure and Google Cloud Platform) to kick-start your SAP projects - within few hours!

SAP Library - SAP Solution Manager The executable library is a structured collection of development objects that users can call directly. An executable fulfills a process step function. For instance, a transaction or an SAP FIORI application can be called by a user. Accordingly, you can consider them executables. **Sap Library Solution Manager** Solution Manager 7.2 introduces what SAP calls "Pragmatic Business Process Management". This is a way to underscore the fact that SolMan 7.2 is more "Business Processes Oriented. 7.1 was IT/Operations focused. 7.2 will try to balance things more, increasing value for Business Processes/Implementation.

SAP Solution Manager provides various tools and methods for implementing and maintaining both SAP and customer solutions. The Solution Documentation model is based on a hierarchical structure, which uses a solution as the single, central point of access for all Solution Documentation content.
