Consumption-based MRP is an
important business process in
almost every company. In SAP,
you can plan material

requirements based on
consumption. SAP provides
important functionalities like
determining net requirement,
procurement dates, etc. This

book explains all the concepts
underpinning SAP ' s MM
Consumption based MRP
Module. It is a comprehensive
technical manual which explains
every single node of the User
Menu and the Configuration.

The book is organized in
chapters that are important
business activities. The author
has taken care to balance details

with overviews that explain
linkages between concepts. In this
book, like author ' s earlier
books, he explains every screen of
SAP MM Consumption-based
MRP. Divided into 16 chapters,
the book clearly explains both the
SAP Menu and the Customizing
Implementation Guide. It also
indicates the chapter number
where these are covered, thereby
creating a direct link between the
book and the SAP software. The
implementation of SAP MM
Consumption Based MRP and
documentation can also be
guided by the structure of this
book.

Enhancements include a streamlined approach to nuclear physics, thoroughly revised and updated coverage on particle physics and astrophysics, and a review of the essential Classical Concepts important to students studying Modern Physics.

CATIA® V6 Essentials

SAP® SD Handbook

SAP ABAP (Advanced Business Application Programming) offers a detailed tutorial on the numerous features of the core programming platform, used for development for the entire SAP software suite.

SAP ABAP uses hands on business oriented use cases and a valuable dedicated e-resource to demonstrate the underlying advanced concepts of the OO ABAP environment and the SAP UI. SAP ABAP covers the

latest version (NetWeaver 7.3 and SAP application programming release 6.0) of the platform for demonstrating the customization and implementation phases of the SAP software implementation. Void of theoretical treatments and preoccupation with language syntax, SAP ABAP is a comprehensive, practical one stop solution, which demonstrates and conveys the language 's commands and features through hands on examples. The accompanying e-resource is a take off point to the book. SAP ABAP works in tandem with the accompanying e-resource to create an interactive learning environment where the book provides a brief description and an overview of a specified feature/command, showing and discussing the

corresponding code. At the reader's option, the user can utilize the accompanying e-resource, where a step-by-step guide to creating and running the feature 's object is available. The presentation of the features is scenario oriented, i.e. most of the features are demonstrated in terms of small business scenarios. The e-resource contains the scenario descriptions, screen shots, detailed screen cams and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature/command are conveyed through execution of these hands-on programs. Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration

objects including the programs rely on some of the SAP application tables being populated, for example an IDES system which is now a de facto system for all SAP training related activities.
