SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration n book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration

n and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP’s view of the module’s key tasks and procedures—including :

Configuring and using the general ledger and accounts payable and receivable screens

Configuring and completing closing procedures,

asset accounting, and financial reporting

Configuring global settings and enterprise variables

Accounting for both profit and cost centers

Creating a house bank

Integrating FICO with other SAP modules

Taking a jargon-free tone and providing an abundance of examples,

Andrew Okungbowa

provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.

This book offers a comprehensive introduction to SAP S/4HANA Sales and Distribution (SD). You will learn the basic fundamentals of SAP SD, with examples based on a case-study approach. Using a

fictional company scenario, you will learn the fundamentals of the order-to-cash process and key flow, from sales order delivery to billing document. Explore the foundational document-the sales order. Obtain detailed information on master data and how it is used in SD. Dive into master data objects, business partners, and

material masters. Review how master data is connected to sales orders and pricing. Understand sales order processing, including item categories, availability checking, dates, shipping, texts, and more. Walk through delivery processing and billing. Familiarize yourself with two of the major SD pre-sales documents -

contracts and quotations. Delve into the post-sales processes, including returns, service, and debit and credit memos. Look at transactional list reports and analytical reports. For readers who are new to SAP SD in S/4HANA, the detailed case study, practical examples, tips and screenshots quickly bring readers up to speed on the

fundamentals. - Foundations of SAP SD in S/4HANA - Sales orders and document types - Master data objects, business partners and material masters - Examples and screenshots based on a case-study approach *Implementing SAP ERP Sales & Distribution* Computing McGraw-Hill This book constitutes the proceedings of the 6th I
