[2448664 - Job SAP_LMDB_NOTIFY_LDB_0000000001 is getting ...](#)

Most of the landscape data application is already sent by the managed application systems to the System Landscape Directory (SLD) and from there synchronized to the Landscape Management Database (LMDb) of the SAP Solution manager 7.1. However, in some cases this data needs to be enriched by data which has been collected by agents and written directly to the CIM model based LMDb.

[Landscape Management Database \(LMDb\) – FAQ - Solution ...](#)

Landscape Management Database (LMDb) is the single source of truth for landscape data as of SAP Solution Manager 7.1 SPS05. Data is provided for many processes in SAP Solution Manager: Maintenance, monitoring, Early Watch Alert, and Change Request Management depend on the data quality in the LMDb.

[SAP Solution Manager LMDb Duplicate Host Name - SAP Q&A](#)

As of SAP Solution Manager 7.1 and higher, technical system information from ideally one or several SLDs is synchronized with the new Landscape Management Database (LMDb). Ususally, the technical systems report installed product versions and product instances (available with newer SAP NetWeaver installations) to the LMDb.
