Dollars and Sense Jonathan Ball Publishers

The emergence of severe acute respiratory syndrome (SARS) in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months.

In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of

international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic, along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.

Value recovery, in the form of the return and repair of reparable spare parts, involves sizable investments of time and inventory. This monograph describes metrics developed to evaluate the Army's retrograde processes. Baseline repair times were found to be long: over a month for items repaired below depot and returned to stock. The authors suggest ways to speed up the movement of parts through the system to minimize the size of the parts inventory.

To keep its equipment ready to fight, the Army needs metrics that fully portray its condition both in the motor pool and during missions. These metrics should connect underlying logistics processes and equipment reliability to equipment readiness results so that the Army can target its resources effectively. The Equipment Downtime Analyzer provides an integrated set of metrics that tie equipment sustainment and reliability to equipment readiness.

Pelvic Organ Dysfunction in Neurological Disease describes the neurological control of human bladder, bowel and sexual function and then details the dysfunctions which may arise as a consequence of various neurological diseases. Easy to read, the book will be of value to any healthcare professional managing patients in whom pelvic organ functions have been compromised by neurological disease. The book provides a structured approach to present day understanding of the neurological control of pelvic organs and the investigation and

management of each type of organ dysfunction. A unique feature of this book is that it addresses the impact of specific neurological disorders on all three functions. The authors have all been associated with the Department of Uro-Neurology at the National Hospital for Neurology and Neurosurgery, London since it was established 20 years ago. This book is a timely review of their accumulated knowledge and the latest literature.

The story of a 'rogue unit' operating within the South African Revenue Service (SARS) became entrenched in the public mind following a succession of sensational reports published by the Sunday Times in 2014. The unit, the reports claimed, had carried out a series of illegal spook operations: they had spied on President Jacob Zuma, run a brothel, illegally bought spyware and entered into unlawful tax settlements. In a plot of Machiavellian proportions, head of the elite crime-busting unit Johann van Loggerenberg and many of SARS's top management were forced to resign. Van Loggerenberg's select team of investigators, with their impeccable track record of busting high-level financial fraudsters and nailing tax criminals, lost

not only their careers but also their reputations. Now, in this extraordinary account, they finally get to put the record straight and the rumours to rest: there was no 'rogue unit'. The public had been deceived, seemingly by powers conspiring to capture SARS for their own ends. Shooting down the allegations he has faced one by one, Van Loggerenberg tells the story of what really happened inside SARS, revealing details of some of the unit's actual investigations.

As the Army has implemented initiatives to improve its basic logistics processes, it has found that these processes are hampered by a financial management system that is slow and inaccurate and that creates errors and delays. This report documents analysis supporting the Army's effort to improve its logistics financial management (FM) processes using Velocity Management's Define-Measure-Improve methodology. In defining the FM process, researchers developed process maps that showed that the delivery of conflicting information from

the supply and finance systems forces units to create time-consuming, manual reconciliation processes to determine their remaining budgets. Researchers identified metrics to measure performance. To improve the quality of price and credit information and eliminate the need for manual reconciliation, the researchers recommended that when a transaction is first undertaken the prices and credits should be used for all records of the transaction.

The U.S. Army War College (USAWC) is proud to present the 28th Edition of How the Army Runs: A Senior Leader Reference Handbook, 2011-2012. Publication of this text at this time, when the Army has been at war for almost a decade, has almost completed restructuring of its operating force, and is addressing the structure of the generating force, as well as completing formidable base closure and restationing actions, gives credence to the enduring truth that in

order to be successful the Army must sustain and improve itself while it is fully committed to the Nation's bidding. The systems and processes documented and explained in this work are designed to do just that. This text was prepared under the direction of the faculty of the Department of Command, Leadership, and Management. It is intended to be used in an academic environment during the study of the systems and processes used to develop and sustain trained and ready combat forces to be used by the Combatant Commanders.

A Guide to School Services in Speech-Language Pathology, Fifth Edition serves as a must read for school-based speech-language pathologists (SLPs), college instructors, and students-in-training. The text begins by providing a brief history of school-based SLP services. The foundations of school services are highlighted, including the legal mandates set forth in the Individuals with Disabilities Education Improvement Act (IDEA); Every Student Succeeds Act, Americans with

Disabilities Act; and landmark court cases that have influenced school services – such as the 2023 *Midthun-Hensen & Hensen v. GHC* court ruling regarding evidence-based practices. Pedagogical features include related vocabulary at the beginning of each chapter to promote equity in comprehension, end of chapter summaries with guiding questions to reinforce important information, facilitate class discussions, and enhance understanding, concrete, real-life success stories from public school SLPs, and links to useful strategies, materials, and resources. This comprehensive textbook addresses issues paramount to school-based SLPs: Options to expand and diversify service delivery models Step-by-step instructions to implement a workload analysis Examples of IEP goals that support flexible scheduling and workload solutions Tables that describe evidence-based practices and provide links to the supportive research Template for writing IEP goals that align with IDEA mandates Methods for

assessing multilingual language learners including dynamic, authentic, and criterion-referenced tools Guidance for implementing proactive behavior management, conflict resolution, professional collaboration, conferencing and counseling and cultural competencies Evidence bases that link language, literacy, and the achievement of school standards New to the Fifth Edition: New content regarding COVID-19 impacts and the expansion of telepractice Current references throughout that reflect state-of-the-art research Updated evidence-based content for practices in the areas of: * articulation and phonology * language and literacy * voice, feeding, and swallowing * augmentative and alternative communication * social and cognitive aspects of communication * hearing habilitation * general clinical strategies Modernized use of pronouns and terms that reflect our diverse society Scenarios that promote reflection of neurodiverse practices Please note: Ancillary content such as downloadable forms and checklists may
